Spoilers! Although this is the first series that I ever made, that does not mean I am finally done with this. I only write this story from 2020-2021 just to let my viewers, friends, and fans to view this story to learn what I am known for. I like playing Roblox and selecting my top favorite games that make this story more realistic than some other stories. This is very important in making a very realistic story by me with a lot of fictional content.

Expect that the purpose of the beta version of this story is to make corrections to make the story more like a typical book when I republish the story into a final version. I did all of this all by myself with support from me playing Roblox games along with random players I have met while gaming as well as gaming from the past years. I cannot believe I am so excited to release this story and present it all to you. And without further ado, let's get right into the story.

Note: There are not any chapter labels except for Prologue and Epilogue. You have to figure out where the start and end of the chapters are by examining the structure of this story. Thank You.

## Prologue

In the afternoon, Midnightlion53 and his family arrive at another house where Midnightlion53's sister in-law lives. Before entering the house, they park the RV at the gas station nearby and buy bloxy cola and food for dinner. They walk to the house and enter. However, nobody is in the house by the time the family arrives at the house. The family explores the main half of the house before sunset. The main half is the living room, the porch, kitchen, family room, and half of the backyard. After exploring half of the house, sunset starts at 6:00 PM. From there, the family eats their dinner that is scattered across the house as well as the ones from the gas stations. The meals that are scattered across the house include milk, chicken and rice, and burger. Other foods and the bloxy cola comes from the gas station. After dinner, the family explores the other half of the backyard with the playground and looks at the two fireworks with its spawners near the sliding back door. This means the 4th of July is coming. They also explore the other half of the house. The other half includes the girl's bedroom to the left when facing towards the bathroom, the office to the right, the master bedroom to the right corner, and the boy's bedroom to the left corner. The family takes a shower one at a time in the bathroom, located on the middle left side of the house when facing towards the backyard. After that, they test out all of the items already in the house before going to sleep in the empty house.

WHEN THE FAMILY WAKES UP THE NEXT DAY, they call their aunts, uncles, siblings, and cousins to ask where they are. Those who live in the house are taking a vacation across the world, but they are forced to be quarantined for a few more days before returning home. The family gets ready to explore the neighborhood before escaping to a new location. They explore the school first because it is the only place in the neighborhood that is not yet explored. The school consists of two front classrooms, a library to the left, the principal's office to the back left corner, the janitor rooms, the bathrooms, and the playgrounds. The school is currently closed for distance learning, but doors remain open automatically like a normal school day anyways.

After exploring the school, the family goes to the house and takes the red van from the garage. Midnightlion53 drives to the subway station. The name of the subway station is Kipling which indicates the name of the neighborhood that the other family lives in. The family checks in the station and grabs the ticket on the floor. They enter the station before lunch. There is a vending machine that is found at the subway station, so the family uses it to obtain and eat lunch. The lunch includes a cola, a burger, a hot dog, etc. After lunch, the family goes to the bathroom and washes their hands. Then they return to the station and wait for the subway to arrive. While waiting, they explore the route map that indicates a line called "Forever Subway".

Forever Subway is the longest subway line in the world. From Kipling, the train is expected to be an almost forever subway ride across the Atlantic Ocean to the first destination in the United Kingdom, where the family is planning to hide. After that, the train should stop in Russia before going to China and Japan. From Japan, the Forever Subway takes a long journey to destinations to Oceania and the Pacific Islands. From there, the subway travels to Los Santos, San Andreas and then to Liberty City before returning to Kipling. The subway arrives at 2:00

PM, which is exactly a day since Midnightlion53 and his family arrives in the neighborhood. Before boarding the subway, Midnightlion53 takes out and uses his amulet that is given by previous members of the Order of the Stone. The subway leaves at 3:00 PM, and the family takes a very long subway ride. For the next two days, the family seems like the subway ride is forever in which the global subway line is named after. The subway travels deeper than the ocean and is 60 meters below sea level. This means the subway tunnel is near the bedrock layers where only power tools can mine to. Eventually, the subway arrives at the next destination where the family gets off. Once the family gets off, they take an iconic red bus to their new rental apartment where they will spend the next few days hiding from Bloxman's control.

MEANWHILE, Dr. Bloxman sends epicrsxxx099811 to Currituck, North Carolina to send mail there. epicrsxxx099811 rents a cabin in Currituck for the next four days. On the first day, he goes to the post office in Swanquarter and gets the mails containing information on supporting and voting for Bloxman for dictator or emperor. Bloxman believes that there must be strict rules across the world and that the world should be dominated by large empires again. From Swanquarter, epicrsxxx099811 drives to drop off mails at homes across Swanquarter and Currituck. After delivering, he returns to the post office and goes to his cabin and goes to sleep.

WHEN EPICRSXXX099811 WAKES UP, he gets ready and becomes a DOT worker. He takes a long drive to the station located near Halifax and takes the DOT truck to the VMS. He goes to the VMS on US-13 north and makes a funny message there related to a dangerous road as a practice to keep outsiders from entering Bloxman's land. After the practice, epicrsxxx099811 takes another long drive back to his cabin to settle down and to go to sleep.

FOR THE NEXT TWO DAYS, epicrsxxx099811 stays at Currituck to complete several missions. First, he starts by robbing as many stores as possible to steal money for Bloxman. Next, he leaves by taking NC-125 north towards the next target which is Robloxia.

WHEN EPICRSXXX099811 ARRIVES, he starts off by stealing as many goods as possible from the town of Robloxia. The town of Robloxia lacks police officers or security. Next, epicrsxxx0998811 goes to Robloxity to rob more places there. One day at Robloxity, he arrests the only two officers and sends them to jail. Even when the two officers are in jail, they are still able to escape by spawning a helicopter on top of the electrical fence and jump onto it without getting trapped. This leads to epicrsxxx099811 shooting the officers to death. Later, he goes to the neighborhood of Robloxia where he invades several houses and gets kicked out by the owners overnight. The next day, epicrsxxx099811 starts by stealing and robbing many places in the neighborhood of Robloxia, even attempting to rob the police station. At the police station, the many officers and SWAT teams send epicrsxxx099811 to jail for assaulting and robbing.

After a few days have passed, the police officers transfer epicrsxxx099811 from the police station jail to the state prison in order to protect prisoners from the coronavirus. This is where epicrsxxx099811 spends a week in prison. He follows the daily schedule of prisoners. Finally, he plans on a way to escape prison and flee to Bloxman's home.

**D**uring the early morning, epicrsxxx099811 gets ready to escape prison. He eats his prison breakfast and explores the prisons for a little bit. Then he continues to spend the time in prison, thinking of where to escape from. Once lunch and yard time starts, epicrsxxx099811 finds a way to escape the prison. Between the police station and the visitor station, there is an escape route that most prisoners escape. The escape route starts from the vene that leads to the sewage system. Hardly any cops caught anyone from the sewage system since they do not believe prisoners escape by taking the sewage system. epicrsxxx099811 goes through the sewage system with water flowing in the escape direction. Eventually, he arrives at the ladder at the end of the system and climbs up. Once he climbs up, he escapes from prison and gets in the nearby car. From there, he takes off and drives to the base.

epicrsxxx099811 drives the car to the criminal base, located in the small city nearby. At the criminal base, he takes off his prison outfit and changes to a normal outfit. He also grabs some guns as well such as the pistol and the shotgun. After visiting the base, he heads off to Robloxia International Airport. He heads off by driving away from the state prison and going through the city. He continues to take the main road towards the first and second tunnels before taking a stop for the night at the nearest hotel. epicrsxxx099811 checks in and sleeps.

EPICRSXXX099811 wakes up again and gets ready to go to the airport to go to his friend's home. He drives the car to the airport and parks there. After parking, he sees the airport is empty with not even a single staff seen. He checks in the airport himself and sees three planes. He goes to the tarmac and helps load the bags on one of the planes. After loading the bags, he gets on the pilot seat on the Delta Boeing 737 and starts backing up. After backing up, he finds the nearest runway and continues to fly. While flying, he stays seated in the skies.

MEANWHILE YESTERDAY, Dr. Bloxman is taking a view at his property looking towards the village. He heads back home and gets ready to discover something. He gets in his car and drives to the village. Once he parks his car at the village, he gets off and heads to a small village house where a random girl villager lives. The random girl attempts to hug Bloxman before getting killed by the shotgun Bloxman shoots at. After killing, Bloxman gets in the house and discovers a gem. He takes the gem with him and drives back to the lab. At the lab just before sunset, he uses the gem at one of the lab machines to scan its potential power for Bloxman.

When sunset arrives, Bloxman drives to the grocery machine and selects the food he wants such as the burger and Bloxy cola. He brings the dinner home and eats it. After that, he goes on the computer to get contact from his friend epicrsxxx099811 before sleeping.

BACK WITH EPICRSXXX099811, he continues a long journey to Bloxman's property. In the middle of the morning, he is about to land on the unique runway that looks dangerous to most people but is told by Bloxman that the runway is not dangerous at all. The plane lands at Bloxman's private runway and taxis to the gate of the private airport. epicrsxxx099811 gets off

the plane and is greeted by Bloxman. Before epicrsxxx099811, Bloxman wakes up and eats his breakfast before getting ready. He goes to the airport, waiting for his friend to arrive. Once the friend arrives, the two head to the office for a secret meeting about goals.

By the time the two arrive at the private office for a meeting, they eat their lunch first. After lunch, they meet up with a few friends that support the two. They have a meeting that lasts all the way through the afternoon. The meeting for the day and the next few days will be about the strong way to take over the surrounding state. In the meeting, Bloxman states that his property is entirely an independent nation surrounded by a US state. First, he is planning to use robots and the new gem to take over the surrounding state. Next, he is planning to avoid surrendering by US army troops and to make sure that he wins the state. Then, he is planning to develop the gem in phases starting from the early phases of the gem. The early phases of the gem would help Bloxman take over the state at first while the later phases of the gem help take over the entire world. Bloxman also says that the lab should scan the potential powers of the gem.

By the time the meeting gets to the development of the gem, the meeting is over. Everyone leaves the office and practices on taking over the state using weapons against villagers within the Bloxman property. Everyone within the property marches towards the village and practices taking over the village by eliminating villagers. They use lightsabers that are created from the lab, a normal volleyball, and a tactical gun. The tactical gun shoots at the enemy that causes the enemy to disappear and die with blue lines around the surfaces of the enemy.

After practicing taking over the village, everyone in the Bloxman property tests all kinds of vehicles and robots in the property. They test out the nearby RV parked in the office and the plane. They practice controlling the robots and how to use them against the US troops. They also

test out other vehicles such as the bus and the truck in the big hangar garage. The bus is used to transport a large number of Bloxman property members anywhere while the truck transports goods. Bloxman plans on modifying the truck and painting the truck black. He also plans on making a secret door that is on the side of the truck with stairs. The inside of the truck is going to include the cockpit for the driving controls and the mobile lab inside the truck trailer interior. The truck interior is going to look like a lab with several computers and scanning for any dangers. The lab should also scan any power that Bloxman members collect.

After testing all of the vehicles out, all of the Bloxman members return to their homes. There are a total of two homes. The bigger one is for Dr. Bloxman, epicsxxx099811, and a few members while the other one near the lab is for other members.

THE NEXT DAY, all of the Bloxman members wake up and get ready for another similar day. They get ready the same way as yesterday and are expected to start the meeting early. Now epicsxxx099811 lives with Dr. Bloxman while other members live in the other house. After getting ready, the members head to the office on how to win and take over the surrounding state.

The meeting takes place in what is called the GeneriCorp building, which is the meeting company for Bloxman. When everyone gets to the meeting, some of them bring supplies and some drinks. Some of them daydream and pretend to sleep during a very long meeting.

The meeting for today, unlike yesterday, is about developing enough strength to take over the entire state. They assign which to take over first before going up. There is an army base nearby the Bloxman property that should be taken over. The problem is that there are so many guards defending the base from invaders and criminals. To solve this, lots of robots need to be

developed. Right now, robots are not very widespread. Luckily, Bloxman knew how to develop a robot when he became a doctor. He is not only a doctor but also constructs and programs the robot. All robots should be programmed to side with Bloxman and go against the US army. Even still, the US army would need back up if they are getting invaded. To do this, Bloxman needs to make widespread robots, which means that the amount of robots that Bloxman has are a thousand times more than the entire world has. Plus robots should be programmed to make smart decisions as well. Another way to handle the army backup is by finding spawn eggs that spawn many monsters to handle the backup army. Luckily, Bloxman knows the history, so he is going to use his robots to help any nearby chickens to become the Eversource. Then all of the Bloxman members and the robots use the Eversource to produce monster spawn eggs such as zombies and skeletons. Both the members, robots, and spawned monsters would be enough to invade the base.

After invading the base, the plan is to take over all cities and towns from small to high. Robots, spawn eggs, and Bloxman troops would be used to combat the defense. The best method to invade is by “lightning invasion”. This method is the fastest and would overwhelm the US defense system, just like any army who used the method. After invading, more robots and spawn eggs would be widespread across the state that should be invaded. The state is big, so the fight is expected to be a long one. However, undead mobs might not be enough to win the state, so other mobs need to be spawned. This includes creepers and spiders. With more weapons and mobs that side with Bloxman, they are able to take over the entire state for good.

After the meeting, everyone leaves the office and goes home for the day. They sometimes test out and practice taking over by attacking the villagers and pretending they are the cops and the soldiers. Finally, Bloxman and his troops go home and go to bed to sleep.

IN THE NEXT MORNING, epicrsxxx099811 is getting ready to celebrate the 4th of July. Not only him but also everyone. However, epicrsxxx099811 is going back to Kipling, which is a neighborhood in Robloxity. There, he is going to the house where Midnightlion53's family visited before they took the Forever Subway to become free of Bloxman.

While other Bloxman troops and Bloxman stay at home, epicrsxxx099811 is getting ready and flying back to Robloxa to celebrate the 4th of July. The purpose there is that while the house occupants are taking a vacation, epicrsxxx099811 is going to use their consumer fireworks and have a small party himself. He also invites his friends, both within Bloxman and real friends, to come over to the party. Nobody accepts the party, but epicrsxxx099811 wants to celebrate anyway. At least he has a phone he can use to record the entire party, including the fireworks and post them to the internet, including all of social media and the public.

After epicrsxxx099811 plans and gets ready for the party, he drives his car to the nearby hangar where all the large vehicles and robots are stored. He takes one of the planes and parks at the nearby gate in case anybody wants to come to the party. After a few hours, nobody still wants to go to the party. This is because everyone wants to stay home to prevent the coronavirus from spreading more. Anyways, epicrsxxx099811 starts to leave his property.

epicrsxxx099811 taxis his plane to the runway. He flies to Robloxa International Airport and makes his way to the transit center. At the transit center, he rides the subway and the bus to Kipling. Once epicrsxxx099811 arrives, he goes to the house.

By the time epicrsxxx099811, it is 3:00 PM, so he decides to take a quick walk to the gas station where the RV is parked earlier. All he buys is the bloxy cola before heading back to the house. At the house, he looks for all the food he wants to eat. He looks through the kitchen and

finds foods such as chicken, milk, burger, rice, and alcohol. After finding all of the food, he goes to the living room and discovers both the gaming consoles and the singing karaoke. At the back door, he discovers two types of fireworks with generators to spawn them after each use. He also brings his own fireworks with lots of them in his inventory.

At 6:00 PM, the party starts, and epicrsxxx099811 starts recording a video. He divides the party into three ways of celebrating. The first celebration is eating a feast of dinner. First, he heats the burger for three minutes and drinks bloxy cola. He eats burgers after drinking. Next, he drinks milk and eats chicken and rice. Then he drinks alcohol and washes hands.

The video recording is still going, and epicrsxxx099811 starts his next step which is singing. Until 10:00 PM, he sings all the songs listed in the karaoke. The song that he enjoys the most is singing oof, which is the most common last word before death. The oof favorite song lasts for at least an hour until 10:00 PM before planning to light off fireworks.

At 10:00 PM, epicrsxxx099811 goes to the backyard and tests out his grill lighter on the BBQ grill. After that, he uses the grill lighter to light the navy blue fireworks. The firework launches and explodes without any sparkles. epicrsxxx099811 lights up the other firework which does explode with a nuclear power that can destroy things except buildings and structures. Finally, he uses his personal fireworks several times before sleeping at midnight.

**E**picsxxx099811 wakes up in the morning and gets ready to return home. He wants to check the developing gem when he gets home. First, he eats his last breakfast at the house and takes a shower. After that shower, he dresses up in his usual outfit and finds a way to get to the airport. He walks to the gas station and finds a bus parked in the back. There is nobody inside the bus, not even the driver. The bus seems to be abandoned, but epicrsxxx099811 takes it anyways. He drives the bus using his job skills to the airport. At every bus stop on the way to the airport, he looks for any passengers who want to go. So far, there are no passengers because many of them are trying to stay home. After a few hours has passed, epicrsxxx099811 finally arrives at the airport and parks the bus there.

When epicrsxxx099811 parks the bus, he gets off and goes into the terminal to self check for the flight. He already knows how to fly a plane since he went to pilot school. In the airport, there is nobody else inside, not even the airport staff and security. After checking in, he goes to the terminal and finds a plane he can use. There are lots of planes in the airport that nobody is in. He picks one of the planes and waits for any passenger. So far, there are no passengers who want to fly a plane for two reasons. Everyone wants to stay home to protect themselves from the pandemic. The other reason is that there are concerns that flights can lead towards the Bloxman empire territory. epicrsxxx099811 waits for hours, monitoring the plane for any damages and filling the plane up with fuel. Finally, he gets onto the pilot seat, ready to depart.

Once epicrsxxx099811 gets into the cockpit, he gets out of the plane and uses another vehicle to push the plane back far enough from the gate. After that, he gets onto the pilot seat again and controls the plane. He makes his way to the nearest runway and eventually is ready to take off. Once the plane is on the nearest runway, it takes off from there.

The plane continues to fly for hours well into the afternoon. As a result, epicrsxxx099811 packs some food there to eat. This is the lunch for the day. While flying, he also explores the entire plane as well and looks into the skies. He also looks down for the ground as well. He takes out the unique map, so he knows where to land back at home. Eventually, the plane arrives and lands at the Bloxman airport where epicrsxxx099811 gets off the plane. Once he gets off the plane, he gets into the terminal and gets welcomed by Bloxman and his troops. Eventually, epicrsxxx099811 and the troops get escorted into the lab by 3:00 PM.

By the time epicrsxxx099811 arrives at the lab, the gem is ready to be used on the mask and the weapons. epicrsxxx099811 uses the phantom gem on the mask and weapons, so they can be powered by tomorrow. Before the weapons are powered, epicrsxxx099811 wants to test to compare the power of the weapons before and after the gem powers it. He is expecting that the gem would take a while, probably overnight, to power up the weapons. When powered, the weapons are able to take out defenders, even their backups that help Bloxman win.

After the weapon power-up started, epicrsxxx099811 returned home to take the van and head to the village for practice. The practice is that the Bloxman people should be able to invade the entire state with the help of the phantom gem. This means that the practice targets the villagers in the nearby village, pretending that they are police officers and soldiers before the real invasion begins. The plan is that the real invasion is going to happen in two days.

Practice has started. The practice for the day is to test all weapons on the villagers without the phantom gem power. The plan is that the entire day tomorrow will be practice for weapons powered by the phantom gem. This is not only weapons that will be powered but also robots and other equipment that help Bloxman win any battles and wars.

epicrsxxx099811 returns home and takes the van to the village. After that, he practices all kinds of weapons before getting powered up by the phantom gem. First, he takes out the villager girl by using the red lightsaber. Then he uses both the shotgun and the rocket launcher to take out the villager boy. However, the shotgun will not be powered, but the rock will be powered. The rock is not strong enough to destroy anything, but with the phantom gem power, the rock would be able to destroy anything as its mass would improve to be very heavy. The heavy rock is too heavy for anyone to carry except those powered by the phantom gem. Eventually, epicrsxxx099811 practices the tactical termination on all stationary villagers before returning home. Once he returns home, he grabs bloxy cola and pizza and eats them for dinner at home in the dining room. He then washes his hands and uses the computer before sleeping at 9PM.

THE NEXT DAY, epicrsxxx099811 wakes up and eats his breakfast. He then gets ready to test all of the weapons and stays home. Before sunrise, he goes on the computer to get into contact with everyone within the Bloxman property about the good news for them. On the computer, he plays several games to improve his IQ and become nearly identical to Dr. Bloxman. Eventually, Dr. Bloxman assigns epicrsxxx099811 as the co-leader of the property. Meanwhile, Bloxman troops are hearing the same good news and are ready to invade. With the power of the phantom gem, there is no need to worry about losing because the plan is to take over the entire state first

in order to go to the next level. The next level would be to take over the entire United States followed by the entire continent. The last and final level would be to take over the world. Since Bloxman has a high IQ level, he can invent a rocket that transports anyone to other planets. This is one of Bloxman's dreams to dominate not just earth but space as well.

By 6:00 AM sunrise, Bloxman people and epicrsxxx099811 head to the village being spotted by the cops. The cops have their caps off to shoot with more accuracy. Before the cops arrive, epicrsxxx099811 puts his mask on and reveals his weapons. The mask and weapons are powered by the phantom gem. With the power, the practice would make fighting the villagers and the cops easier, which means the army base would be easier to take over. Back in the morning, the cops found the secret Bloxman property and tried to invade to take back the property from Bloxman since they are planning to take over the world.

epicrsxxx099811 and some Bloxman troops arrive towards the village where the police officers are about to shoot them. They feel like they have five stars due to the fact that the police officers treat Bloxman's property as their own country and not part of the United States. However, Bloxman is the only country in the world to not be approved by the United Nations. This is because the United Nations may have known to treat Bloxman as the nation to take over the world and become thieves with far more violence than ever before.

Once Bloxman troops and police clash, epicrsxxx099811 uses defense against his friends and troops and attacks half of the police officers using his phantom power. The other half is used for the many troops with Bloxman attacking a quarter of the officers. The battle rages for the rest of the morning. The Bloxman army and the police officers keep fighting until the battle heats up. Eventually the battle ends just in time for lunch when epicrsxxx099811 uses the tactical

termination on all the police officers. The tactical termination guns shoot at anyone and kill them by getting zapped, so that the enemies do not call for backup to keep fighting.

After the battle with the police officers are over, epicrsxxx099811 and his Bloxman friends head into the village and start fighting the villagers. The villagers are too weak to attack Bloxman's army, especially with the phantom power. As a result, epicrsxxx099811 and his army uses the phantom method to wipe out so many villagers in one day. Before fighting, Bloxman and his friends eat lunch at different village buildings before they train themselves.

After lunch, Dr. Bloxman and his troops continue fighting with the villagers. After the village becomes almost empty, they wander off into the wild and hunt for more food and resources, using the phantom power. The phantom power can kill and wipe out multiple mobs in just under a minute. Later, Bloxman's gang returns home and goes to sleep.

ON TUESDAY JULY 7, Bloxman's gang wakes up and eats their breakfast. After breakfast, they take a shower nearly at the same time. They then plan on spending the entire day invading the nearby army base which is home to the largest military base in the entire state. The Bloxman soldiers attempt to invade the base and actually win the battle against the US army, even their backups from other bases. The police officers would also block Bloxman from entering the base.

By the morning, all of the Bloxman troops pack their inventories and gear up their robots and vehicles to come with. They leave their own base and take a long journey to the army base. On the way to the army base, they test out the attacks of all of the gears. Meanwhile, epicrsxxx099811 flies quickly to the front of the army base. Another regular member of the Bloxman gang attempts to fly to the base but ends up getting arrested by the US army upon

arrival. epicrsxxx099811 is the first Bloxman gang member to arrive in the army base. A few hours later, Dr. Bloxman and his other surviving members arrive at the front of the base.

At the front of the base, the gang members are confronted by the police officers, who are constantly shooting at the entire gang. Using the robots and strong weapons, the gang members quickly wipe out the officers. epicrsxxx099811 uses his phantom powers such as the phantom rocket launcher to wipe out large amounts of police waves. Dr. Bloxman wipes out several waves of police officers using his robot weapons. Finally, the battle against the officers defending the army base is over when the tactical termination is used on the rest of the police waves.

After using the tactical termination, epicrsxxx099811 uses his phantom rock to break the front gate into the army base to let his gang members invade the base. Inside the base, there are several, stationary soldiers who are defending the base from the gang. With no match, the gang members overpower the soldiers using both the robot and phantom weapons. The first wave of soldiers are located in the front of the base which is wiped off by the Bloxman gang. The second wave of soldiers are located in the middle of the base between the front and the runway where they are also killed. The third and final wave of the soldiers are located along the runway where they are killed as well. epicrsxxx099811 fights half of the entire battle using his phantom weapons. The phantom weapon blasts half of the defending soldiers. By the time the gang fights the soldiers, they win the base without any more backups from the US army.

The final step to invading the base is replacing signs of the United States Army Base with Bloxman army base. To do that, the gang members tear down and burn all of the American flags in the base first. They also remove information about the United States Army. Then they replace the flags and information with the Bloxman ones. After the final step is complete, the army base

is now taken over by the Bloxman gang. Anytime a police officer or army tries to take back the base will either get kicked out by Bloxman soldiers or get teleported far away from the base by the borders powered by the phantom gem, so Bloxman's new base is safe.

Later, half of the Bloxman gang members head home, including the doctor and his friend epicrsxxx099811. The other half occupies the base with their goals of defending it. On the way home, the gang trains their weapons to make them stronger and practice fighting. The trip takes the gang through sunset. When the gang arrives home, they park their equipment in the garage hangar and park their personal vehicles in their garage. After that, they eat their final dinner as a celebration of the victory of the army base invasion. They plan on prosecuting anyone against Bloxman's strict dictatorship, which will likely happen tomorrow. They will first build the prisons and traps. Finally, all Bloxman gang members go to bed and sleep.

**T**he Bloxman gang wakes up the next morning, ready to defend and use their nation. They eat their breakfasts and take a shower. Then they get ready in the morning and are ready to get out. Before getting out, they pack their weapons up and their powers. They head to the hangar and gear up on their weapons. The plan is to kidnap and torture all of the villagers living in the nearby village. This includes sending them to jail. After getting ready, the gang heads outside and plans on starting construction.

The gang then starts their construction by gathering items in the mines and wild forest nearby. They then head to their own factories and produce blocks that can build the structures for the goals. The plan is to build a prison, a crusher, and an outdoor gas chamber. These are three ways villagers and anyone resisting Bloxman ends up. Another way is just a direct kill. The construction takes through half the morning. epicrsxxx099811 applies his phantom powers on the construction of the jails and hazards for the criminals and prisoners. The criminals are defined as anyone that resists the Bloxman goals as well as random villagers as well. They also plan on prosecuting certain races that the Bloxman gang hates the most such as their culture.

Halfway through the morning, the gang then tests out the functions of the structures and make sure they work. The structures do work properly. Next, the gang then constructs a border that kills anyone and destroys anything who trespasses the borders except the gang members and their objects that they own. The borders are located on the sides of the property that borders the

capital, even though the entire state is taken over. However, the gang believes that the police and the army are able to invade to take back their land from the Bloxman gang.

To resist this, the Bloxman gang prepares for any invasion. Shortly, a wave of five police officers arrive in the Bloxman capital and try to attack the gang. However, the strong armor and defense is no match for the police officers. The police officers are then lured to jail where epicrsxxx099811 sends all of the officers to three prison cells. When the officers go to jail, they still have their guns as the gang are unable to take away their guns.

After sending all of the officers to jail, the next step is sending random villagers to jail as well. epicrsxxx099811 kidnaps and takes the villagers to jail. He runs fast as he transports the villager to jail. Once the villager is close to jail, he lets go of the villager and opens the jail cell that is empty. Then he retakes the villager and sends them to jail. Last, he closes the door and locks. This process repeats over and over again until lunch time.

During lunch time, the gang gets their lunches from the food machines by the airport and eats them at their houses. Some of them eat in their offices as well.

After lunch, the gang starts to send villagers to other hazards. epicrsxxx099811 kidnaps another villager and goes to the crusher. He moves the crusher down, and the crusher kills the villager. After killing the villager, the process repeats over several times until epicrsxxx099811 plans on sending villagers to the gas chamber. epicrsxxx099811 kidnaps several villagers and sends them to the gas chamber. Once the villagers arrive at the gas chamber, some of them are sent flying towards the border, killing them instantly. Others are suffering in the gas chambers while the rest are sent flying everywhere before impacting the ground and wall that mostly kills them. Finally, the gang goes home for the day and goes to sleep at night.

THE NEXT DAY, Bloxman's gang wakes up and plans on exploring the new army base. They eat their breakfast and get ready to explore the base. After that, they head outside and start traveling at the start of sunrise. From there, they take a long trip to the army base. They bring their gears, so they can upgrade the army base and make sure that the base is not taken back. On the way to the base, the gang is planning for the next few days to prosecute more people that they consider enemies. They lay out the ways to prosecute. They can arrest them, torture, and kill. They also make sure they have enough power to keep it like that as well.

epicrsxxx099811 is the first gang member to arrive at the base by flying using his phantom mask. A few hours later, Bloxman's robots and his other members arrive at the base. They see their parked vehicles scattered across the base. They look at the front of the base and reinstall the defense system and alarm system to alert the members that there is an attack going on by the US resistance members. The US resistance members include all of the police and the soldiers since they tend to resist Bloxman's orders and goals. By the time the gang arrives at the army base, there is no resistance found at the base, so they are safe in the base.

After exploring the front of the base, the tour then starts at the base. The gang explores the front of the base where the gates are. The front is intended to welcome anyone that is not the resistance. To the left of the base is the assembly center. The assembly center includes many seats, a stage, and a statue. The statue has been modified and changed to look like Dr. Bloxman. Meanwhile, all announcements and events take place at the assembly center. Examples of this are plans, goals, and purposes of the Bloxman gang and why they exist for this.

To the left of the assembly room is the main office. The main office includes many rooms. It also includes a small assembly room or a classroom to teach new members of the gang

the basics and goals of the Bloxman gang. The main office also includes a welcome center and a hallway leading to many rooms. Most of the rooms are empty, but some are owned by famous Bloxman gang members. The hallway also leads to the office storage as well. The two most important rooms are Dr. Bloxman and epicrsxxx099811. Their rooms are located next to each other with the purposes of planning and expanding their goals too.

At the back of the office are the parking lot leading to several vehicles. To the right of the front center is the ex building where goods and clothing are stored. To the right are several buildings. One of the most important areas to the right are the camping area, where new members must go through to pass. The camp can also be used for torture for anyone with resistance. The back of the base is mostly runways and air force offices that determine how safe a flight is. Finally, the gang members return to their homes and sleep for the night.

BY THE TIME THE GANG WAKES UP, a wave of police officers arrive at the Bloxman capital and look for anyone there. Meanwhile, the gang gets ready for another day and plans on continuing the activities from yesterday. As soon as they get out of their homes, they see a wave of police officers heading towards them, so epicrsxxx099811 uses his phantom mask to copy himself and craft a replica to help fight the police officers. However, the replicas become ineffective in fighting the police officers, so epicrsxxx099811 himself fights off large numbers of officers. The rest of the gang then prepares for the rest of the battle.

While epicrsxxx099811 does most of the fighting, Dr. Bloxman and his soldiers also help fight the officers as well. The waves of police officers seem endless with many backups still wanting to take back the Bloxman capital. However, the officers are unable to find effective

waves to kill off the Bloxman soldiers because they have a much weaker power. epicrsxxx099811 still fights using all of his weapons and is still able to kill off many officers. Finally, the battle with the officers is over when epicrsxxx099811 uses tactical termination to kill all the waves of the police officers and his ineffective replicas. The tactical termination also affects the ability for any resistance to call for backup, which causes the battle to effectively end. In order for the tactical termination to become effective however, enough enemies need to be smashed. Otherwise, some extra enemies may still be able to call for backup. This causes all of the major battles that Bloxman fights to become very long to smash so many enemies.

After winning the battle against the officers, the next target to smash are the villagers nearby. Some of the villagers and officers are in prison while some others are dead. However, the vast majority of the villagers are still living and hiding inside. Some of them are even hiding underground as well and living their own lives hidden from the rest of the world. This is why the village seems like there are few villagers but has a lot of villagers though.

The Bloxman gang then heads to the village with Dr. Bloxman and epicrsxxx099811 leading the way. They start smashing the villagers by using their own weapons despite being cruel. They have enough practice of handling the officers and soldiers against the gang. When the gang smashes the villagers, the villagers have little or no weapons to defend against, making the battle a lot easier for the Bloxman gang to win off. However, there are a lot more villagers that are still hiding, but the Bloxman gang calls that all the villagers are killed.

After seemingly killing the villagers, the gang then celebrates their victories at the airport and grabs their own dinners at the front of the terminal for a gathering. They do not care if they catch any disease because the phantom gem and the doctor's knowledge would know how to

fight off all diseases. In fact, the gang defines diseases as the microbes that either enter the body and attack or anyone that attacks Bloxman's invaded properties. During a disease, the Bloxman gang fights off either the microbes or enemy soldiers and easily wins. During diseases, the gang always wins over enemies in a short amount of time. They believe they would never lose a battle, war, or diseases against any enemy in the universe. After dinner and celebration, the gang returns to their homes and relaxes. From there, they go to bed and sleep.

THE NEXT DAY, the Bloxman gang wakes up again and eats their breakfast. They then take a shower and dress up for the day. They also have a challenge as well. They need to separate from each other and become in charge of different areas across the state, since the state is large. However, Dr. Bloxman and epicrsxxx099811 will take different roles and travel within the state to help their soldiers prosecute other villagers and resistance members.

During sunrise, most of the Bloxman soldiers leave the capital and head to different areas across the state. Some of them make their way to the army base while the others stay at the capital. Dr. Bloxman and epicrsxxx099811 stay at the capital for an hour. After an hour has passed, epicrsxxx099811 flies to the army base and starts prosecution. This happens for the entire morning with lots of enemy officers and soldiers getting caught.

In the army base with epicrsxxx099811, he patrols the army base and spots waves of officers and enemy soldiers. When the enemies arrive, epicrsxxx099811 smashes some of them and arrests the others to force them to do several activities. Meanwhile, Dr. Bloxman does the same at the Bloxman capital. Other gang members across the state do the same as well. At the end of the morning, the gang members across the state steal their lunches from food locations

across the state and eat them. After lunch, Dr. Bloxman and epicsxxx099811 start to call their troops to patrol the capital and the army base respectively while the two patrol the entire state for the afternoon. When they patrol, they fight several enemies for the afternoon.

While some of the enemies are killed, others are experiencing stages that Bloxman calls them. The first step to this is stripping the rights from their enemies and taking away citizenship. The next step is to treat them like pathogens and animals instead of humans. The final steps are slow ways to kill off the enemies by making them to suicide work. Examples of this kind of work are working for hours without any breaks and sleep. In fact, prisoners are given water every three days and food every week, which is the time that they barely survive. When they are given food, they are given little amounts. Also during workout time, the guards force the prisoners to do thousands of reps and run across the world on a treadmill at the fastest speed. The prisoners are also forced to lift weights that are as heavy as all the weights in the world. These conditions cause prisoners to become vulnerable to diseases and death.

When the day ends, the Bloxman gang goes home and sleeps while the prisoners suffer. Some of them die everyday from forced, harsh conditions.

# A

fter sleeping, the Bloxman gang wakes up and goes onto their next step. Since the divorce of Bloxman's old wife when he leaves Greenville, he wants another, better wife to handle with. However, all of the gang members of Bloxman are men, so the next target is Midnightlion53's wife. Before sunrise, the gang gets ready and plans on getting to Midnightlion53's mansion in Robloxia. Since Bloxman has data of where everyone lives because of hacking skills, he can locate where the mansion is. The mansion is located in the east neighborhood of Robloxia on the northwest corner of the valley.

Dr. Bloxman alerts epicrsxxx099811 to help him kidnap the wife from Midnightlion53. The problem is that Midnightlion53 is one of the best officers, so this is why Bloxman needs epicrsxxx099811 since he has the phantom powers. Bloxman and epicrsxxx099811 plan on traveling to Robloxia by both flying. Bloxman goes to the hangar and gets his plane. He parks the plane at the airport gate and allows any gang members to come with. No gang members come, so Bloxman leaves and flies all by himself. In the middle of Bloxman's flight to Robloxia, epicrsxxx099811 uses his phantom mask to fly to Robloxia. Eventually, epicrsxxx099811 arrives in Robloxia and waits at the gas station. He takes his phantom mask off at the gas station and waits for Bloxman to arrive. Bloxman just landed at the Robloxia airport and exited the plane.

When Bloxman leaves the plane, he explores the airports and finds a car to steal with. He goes to the nearest rental car place and steals a van there. Once he steals the van, he drives to

Roboxia without any cops chasing. Eventually, Bloxman arrives at the neighborhood of Roboxia and heads to the gas station to pick up epicrsxxx099811.

The van then heads to the mansion where the family lives. It passes Bottomrock Cafe and turns left towards the mansion. When the van arrives at the front of the mansion, Bloxman and epicrsxxx099811 get off in the afternoon. They see the family inside the house, who forgets to lock the door. The two visitors get in the house and meet the family. When they do, they attempt to kidnap the wife. Just before planning to kidnap, Midnightlion53 uses his police job inside the house to kick the two invaders out of the house and lock the door. Once the door is locked, the invaders cannot get inside the house. However, there is another way to break into and get in the house. And that is shooting and breaking the windows. Both Bloxman and epicrsxxx099811 carry pistols, so they can shoot at the windows. The two shoot at the windows and fully break the glass. Once they break the glass, they get in the house and rob it. They steal the family's groceries and some furniture as well. epicrsxxx099811 starts to wear a phantom mask again. Once epicrsxxx099811 wears a phantom mask, he teleports Bloxman and the family into a random forest located in the state that Bloxman took over. The forest happens to be a park where anyone can get easily lost due to a lack of maps and hard navigation.

In the forest, the group explores the forest and finds seven bench areas over there with three benches each. They wander around the forest finding a way out. Some of them start swimming in a small lake and deep underwater caves. Some of them explore some areas of the underground as well. They spend hours wandering around the forest. Midnightlion53 and his family like the forest so much while the two Bloxman gang members can easily find a way out. epicrsxxx099811 wears his mask again and flies out to point where the Bloxman capital is.

Based on the direction epicrsxxx099811 points, Bloxman starts walking through the forest and into the plains until he reaches the capital. Once he reaches the capital, he hires four gang members to become wedding planners. Meanwhile, epicrsxxx099811 and Midnightlion53's family continue to stay in the forest until sunset. When sunset comes, epicrsxxx099811 flies back home while the family is stranded in the forest, sleeping in the caves and trees.

THE BLOXMAN GANG WAKES UP AGAIN and starts to prepare for the wedding. First off, the gang should be able to make moon travel easier, where the wedding takes place. They are able to construct anything on the moon such as the church. To get to the wedding, the gang needs to complete several missions and steal many items and artifacts for the wedding across the world. This also includes the construction of specific vehicles and weapons as well.

The vehicle that the gang is going to construct is the ship that flies instead of sail. The ship is going to look like an advanced pirate ship with wedding decorations in it. The biggest challenge to this is how will the ship fly in the air. Bloxman starts to design propellers that make ships fly. Ships do not have to have wings to fly. Flying ships are the best transport method to travel around the world without being spotted by the police and the military. However, the challenge to this is military jets, so the ship should have cannons installed.

The construction of the flying ship begins. First, epicrsxxx099811 selects an abandoned pirate ship somewhere in the ocean and teleports them to the Bloxman capital. Using the phantom gem power, epicrsxxx099811 fixes the ship to look brand new. The longest step to constructing a flying ship is decorating the ship with wedding decorations. Furniture is also installed as well. In the future, stolen items and artifacts will be stored in the flying ship. The

next step after is installing propellers that make the ship fly in addition to the sail. The final step to finishing the flying ship is for defense. In order to defend the ship, the gang needs to add cannons and ammo powered by the phantom gem. These weapons would either kill off the resistance jets or teleport them to a hazard or somewhere far away. After the final step is complete, the ship is complete and needs to be tested before taking off. The gang pretends to have a vacation with the ship and flies the ship around their state. After that, they land back to the capital and store the ship inside the hangar before being done for the day.

Meanwhile, Midnightlion53 and his family are still stranded. They lost their wife to Bloxman's gang. They continue to wander around the forest more until they escape the forest and find a way to stop Bloxman. However, the family heads towards the capital and is kicked out by the phantom gem border. As a result, they are teleported back to their mansion.

WHEN THE GANG WAKES UP, they plan on going to several theme parks for two purposes. The first purpose is to examine the themes in each park and find something useful for the wedding. The other purpose is riding some rides and using ride experiences to construct a death theme park located across the Bloxman state. In the state that Bloxman took over, there are several theme parks that can be converted into death parks. A death park is a theme park where rides can either torture or kill the passengers after being tricked into thinking of a thrill ride.

After planning for three hours, the gang splits up and examines several theme parks. For the morning, Dr. Bloxman and epicrsxxx099811 stay at the capital, but epicrsxxx099811 patrols the army base for the other half of the morning, starting at 9:00 AM. The four wedding planners then split up to lead each group of gang members to each corner of the state. They divide the

state into four regions based on geography: Northwest, northeast, southwest, and southeast. They lead many gang members to all of the theme parks throughout the state. First, they spend the morning exploring the theme park and looking for useful themes for the wedding. Some of the themes are useful for minor purposes of the wedding. Other themes are not accepted for the wedding. The planners continue to lead the gang until the end of the morning.

The morning ends when the gang calls for lunch. Bloxman and epicrsxxx099811 grab their own food from the bases while the four groups steal food. All theme parks have restaurants that are closed for the pandemic, so they steal food from the restaurants. Other gang members farm their own food in the stolen farms and bring them to the theme parks as fast as possible. Food production becomes faster thanks to the phantom gem by epicrsxxx099811. During lunch, everyone eats their own food and is ready for another adventure again.

After lunch, the roles have been switched. Bloxman and epicrsxxx099811 are on the way to the theme parks to supervise and watch the gang and the planners. Now the planners and the gang must operate and ride theme park rides to get a feel of how the resistance feels when they ride but can cause injury and death. They ride on all of the rides and then plan on converting the rides into death rides. The reason why gang members need to ride is because the planners need to locate the death section of the ride. The best spot for the death section is after a big drop, heading up a potential ramp, or derailing a roller coaster while going upside down. For the other rides, passengers should experience a crash or get thrown nearly to death.

After planning to convert theme parks into death parks, all of the members head to the capital, even though some of them move to a new house to a new location within the state. When they arrive home, they eat their dinner and go to bed to sleep.

BLOXMAN AND EPICRSXXX099811 are ready to steal themes from the Robloxia theme parks and convert them into death parks. They get ready to leave their homes and examine the parks at Robloxia. Before leaving, they tell the four planners to keep an eye out at the Bloxman territory for the rest of the day while spending the day at the theme parks.

The two then get the plane from the hangar and park at the airport gate. They wait a few hours while inviting other gang members to the adventure. After a few hours passed, nobody got on the plane, and the two then flew off to Robloxia. When the two arrive and land at Robloxia airport, they get off the plane and find a way to get to the theme park. The only way to get to the theme park is by bus though. The two find a bus somewhere in the airport and capture one. From there, they drive the bus to Roblox Point Theme Park. Once the two arrive at the park, the park seems like they have reopened with social distance, which is why some visitors show up but are not too crowded. Finally, the two Bloxman leaders enter the park.

When Dr. Bloxman and epicrsxxx099811 enter the park, they look for themes that they can steal with. In the wedding, plants are nice to be around with. A rocket or rocket-like transportation is required to have a wedding at the moon. The beach theme is not required since weddings do not happen at beaches often. With enough information, the two go towards the jungle and Jurassic themes to steal some plants. After that, they go to the speed theme and steal that for the speed of the flying ship. Right now, the flying ship is unable to make it to the moon, so the ship needs to go faster. Finally, Area 52 theme is needed to power up the flying ship that helps travel to the moon. Area 52 is the source for future technology for moon buildings..

After exploring and stealing the themes, the two ride on the roller coasters for holocaust experiences and eventually check in at a nearby hotel to go to sleep.

THE NEXT TARGET is the Watersurfian Theme Park. Bloxman and epicrsxxx099811 need to find a useful theme over there. In the morning, the two arrive at the theme park and enter. Once they enter, they discover the differences between nice and mean staff, who look like noobs. First, the two ride at the rides and discover the themes that can be useful for weapons. The main theme for the park is needed to support oxygen for both the flying ship and the moon in space. Other themes involve riding flying cars that dodges traffic and can use that technology to make sure that the ship is flying. After visiting and robbing, the two go to another park.

Next, the two head to Blox World Theme Park and Robloxia Wonderland. These two theme parks have important themes that can help for the moon wedding. Finally, Dr. Bloxman and epicrsxxx099811 go to Robloxian Waterpark and steal some water from there to provide enough water for the moon wedding. They go back to their hotel and sleep.

AT THE HOTEL, Bloxman and epicrsxxx099811 wake up and get ready to leave Robloxia to go onto the next adventure. They are not going home yet as they still have lots of places to go to steal things needed and wanted for the wedding. The next plan is robbing several businesses at the Harriston Metropolitan Area which includes Westover Islands, Odessa, Newark, Delancy Gorge, and of course Harriston. The plan is to spend a week robbing the businesses, and when the cops try arresting them, the two would activate power and escape from the cops instead of fighting. After planning on robbing the metro, the two check out of the hotel and steal a random car to the airport. Once they get to the airport, they start the process of flying.

Since the airport is empty, Bloxman and epicrsxxx099811 checks in and helps themselves go through the security camera before preparing for the flight. Since Robloxia and Harriston are

pretty close to each other, the flight should be short. They go to a terminal with cheap airlines and check in with Southwest Airlines. They prepare to fuel up the plane. For a few hours, they wait for any supporting passengers to get on the plane. After a few hours pass, the plane starts to leave the terminal and head to the runway before taking off into the skies.

The flight only takes about an hour to get from Robloxia to Harriston. Eventually, the plane arrives at Serenity Crossing International Airport and lands at the gate. The two pilots get off the plane and make their way to the airport exit. Once they get to the airport exit, they go to the parking lot and find a car to steal. The 2005 Monarch is parked at the parking garage where the two break the window to steal. After stealing, epicrsxxx099811 uses his phantom gem to repair the broken glass. Bloxman then drives south towards the Palm Shores Hotel.

By 11:00 AM, the car just passes the Cape Ann Bridge and is on the way to Palm Shores. The car continues south on I-95 south until the exit to US-40. Once the car exits onto US-40, it turns left into Bordenville. The car then heads east directly towards Palm Shores, passing through the two bridges and the South Beach Island. Once the car arrives at Palm Shores, the plan changes as sunset comes very shortly. In the summer, the day lasts longer and the night lasts shorter. By the time Bloxman and epicrsxxx099811 check in the hotel, they enter the room and find out that the time in the kitchen is ticking faster at night than in the day time. This is because the official night time runs from 6:00 PM-6:00 AM but lasts only half as long as in the day.

After learning about the new time system, the two eat their dinner stolen from various restaurants across the adventure. The phantom gem can also use fire to cook food in a split second as well. After dinner, the two wash their hands and wait for 9:00 PM before going to sleep. They plan for the rest of the time before they make their way to sleep.

WHEN BLOXMAN AND EPICRSXXX099811 WAKES UP, they eat their stolen breakfast and get ready to spend the entire day robbing the businesses across Westover Islands. They get in the car and drive to the Westover gas station and dealership where they obtain their black van and rifle. The two first talk to a stationary criminal to buy a rifle for R\$70. Then they obtain the van purchased before the adventure begins. Before robbing, the two plan on spending the day robbing across Westover Islands with different roles. epicrsxxx099811 plans to hunt for police officers and rob several businesses across Westover while Bloxman robs the rest of the businesses across Westover Islands. Then their heists begin. The reason why the two need to rob several businesses is to gain enough money for the upcoming moon wedding.

epicrsxxx099811 drives through a crowd of street racers and parks the van at the clothing shop. At the clothing shop, he robs more than \$250 from the cash register. Since there are no police officers around, they do not respond and just let crimes happen. After that, epicrsxxx099811 robs several more businesses until he goes to the police station. At the police station, he robs the front desk and quickly escapes to visit more businesses.

Meanwhile, Bloxman heads towards Kensington where he robs the ferry terminal and the hospital. Then he robs many of the businesses, including the fire station and the car dealership. After that, he goes to South Beach to rob the gas station and steal some goods from several empty houses. Eventually, Bloxman and epicrsxxx099811 head to Palm Shores.

At Palm Shores, the two meet again and rob many businesses there for the last time before sunset. At sunset, they return to their hotel and eat their newly stolen dinner. After that, they wash their hands and plan on robbing Odessa tomorrow. Finally, they notice that time is moving fast at night again and wait before they quickly sleep at their beds.

ONCE BLOXMAN AND EPICRSXXX099811 wake up, they eat their last breakfast before planning to move to Bordenville. They take a shower one at a time and move through the fast night. They also dress up in clean clothes and ready for another wave of robberies.. By the time Bloxman and epicrsxxx099811 check out of the hotel, sunrise begins. During sunrise, the two get in their van and drive off towards Bordenville. They turn right to US-40 east and go to the nearest U-turn. From there, they head west along US-40 and travel a long distance all the way to Bordenville. At Bordenville, they see one cop working there on the radar. As a result, the van passes Bordenville and heads towards Odessa. At the intersection of US-40 and US-1, the van turns right and drives until they arrive at the Odessa police station.

At the police station, the two look for the police officer there, but the police are nowhere to be found. As a result, the two plan on making robberies across Odessa.

The two head to several stores, including the Pit Stop gas station, and rob several businesses there. The robberies in Odessa are pretty short. Then the two go to Cape Ann State Park and start stealing materials over there for a short time. They head back to Bordenville and start several robberies without getting detected by the cops. By the time all of the robberies are done, the two have a total of millions of dollars stolen in addition to the millions taken by invading the entire state where the Bloxman capital is founded. There is even a bank in Bordenville where the two start the biggest robbery in the Odessa region, a heist.

After the heist, Bloxman and epicrsxxx099811 go to the motel and check in at the second floor. They enter the room and explore it. This is where they eat their dinner and settle down for the night. They watch some TV and play some activities at home. They also plan on stealing more money and goods for the wedding. Last, they go to sleep.

WHEN THE BLOXMAN TEAM WAKES UP, they eat their breakfast and take a shower. They then get ready and check out of the motel in Bordenville. They get in the van and drive off to the next target, which is Newark. They drive to US-40 west and stay on the highway until they reach Newark. Once they reach Newark, they see many of the businesses that can be robbed. They also look for a hotel to settle down with for the night when it comes.

Meanwhile, Midnightlion53 and his kids are on a mission to rescue the wife and mom. It looks like Bloxman has been kidnapping the wife the whole time while on the adventure to get wedding decorations and materials. Whenever Midnightlion53 and his kids are awake, they follow him as the police officers and try to stop the Bloxman group. All of the attempts are such a failure as the Bloxman group hides against Midnightlion53. In fact, the group knows where Midnightlion53 is and tries to avoid that location. Midnightlion53 also does not know where the group is since criminals are not usually located on the map.

Back with the Bloxman group and the kidnapped woman, the guys start several robberies across Newark. Without any incident with Midnightlion53, the group is able to rob the police station without getting encountered by Midnightlion53 and his fellow officers. In fact, the group robs many of the businesses, including the hospital and the fire station. Whenever the group goes to the store, they loot all of the money and goods for their nation.

Finally, the group is able to make half of the robberies in Newark today. The robberies that are done first are the basic businesses and some stores. The group plans on robbing the hotels and the banks tomorrow. When sunset comes, everyone finds a hotel or cabin to go to and settle down for the night. They check in first and explore the entire shelter. After that, they eat their dinner and get ready to go to sleep. They unpack their things and then sleep.

THE NEXT DAY, Bloxman and epicersxxx099811 are planning to rob the other half of Newark while keeping the kidnapped with the group, preventing Midnightlion53 from rescuing her. Meanwhile, Midnightlion53 and his kids are planning to stop the Bloxman group and rescue the wife and mom. This means that the family are going to work as a team to stop Bloxman as police officers. Midnightlion53 hires his kids to stop and rescue them.

When the sun rises, the day for both groups begins. The Bloxman group starts to rob small businesses at first. They also rob and steal church items to decorate for the moon church. They also examine the building architecture to determine what kind of designs will the moon building be like. Two basic buildings need to be built on the moon. The first one is the church where the wedding will be held. The other building is the hall of prisons where it will store anyone trying to crash and rescue from the forced wedding. The costs of building on the moon is so high that the group is able to rob all of the businesses in Newark by the end of the day.

When Midnightlion53 and his kids start the day, they look at cameras across Newark and spot the enemy group many times over. Whenever the family goes to the spot where the enemy was before, the enemies are nowhere to be found. It turns out that cameras do not have the ability to track down specific criminals. Even with helicopters and lots of officers, they will not be enough to catch and find the Bloxman group as there are many hiding places.

Back with the Bloxman group, they keep hiding in places where criminals are commonly found. They also hide in private rooms and small rooms across multiple buildings in Newark. These places are so hidden that no cops can easily find them. In fact, the police department would require thousands of police officers to look into every room. Eventually, the sunset begins, and all of the groups spend their last nights in their hotels to sleep.

THE GROUPS WAKE UP with the same plans as before but in a different location. The next target to rob for Bloxman is the Delancy Gorge Region. First, the Bloxman group gets ready and heads to DE-41 north towards North Newark. From there, they drive the van west towards Gerald Ferry where they rob the hospital and all the businesses there. Meanwhile, Midnightlion53 and his kids are chasing the Bloxman group without encountering them.

After robbing Gerald Ferry, the Bloxman group leaves and robs Pomeroy. epicrsxxx099811 robs all of the businesses in Pomeroy while Dr. Bloxman climbs up the mountains and starts looting materials he can find over there. When the two Bloxman members meet, they head to Delancy Gorge to find the police officers. When they get to the police station, there are no police officers found in their sight to fight with.

After looking for the police officers for an hour, the Bloxman group finds out that the police officers are not in the station list except for Midnightlion53 and his kids. The two groups try to meet but keep spending hours as one group wants to hide. Eventually, the two groups meet with Midnightlion53 attempting to arrest the other group. However, the other group escapes from Midnightlion53 and hides in a building before resuming more robberies.

After hiding, the Bloxman group goes to school and steals a lot of stuff from there. They also rob several businesses in Delancy Gorge, including the church that tells the time. In the church, the group steals many goods over there for the moon wedding. Then they continue to rob several businesses nearby until sunset where they check in at a local house.

The Bloxman group checks in the house to go to sleep while Midnightlion53 checks in at a house at the other side of the town. In the houses, the groups eat their dinners and unpack their gears for the day. Last, they explore the houses and go to sleep in their beds.

WHEN THE GROUPS WAKE UP, they prepare for the morning and plan on leaving the Harriston metro area. However, the Bloxman group is planning to leave for Noyan in Canada while the police family patrols for half the day before sleeping in the afternoon. The Bloxman group packs up everything in the house and places them in the van before heading to the airport. Dr. Bloxman drives the van to the airport by going west along DE-92 before turning right to merge onto I-80 east. Eventually, the van goes north along I-95 past downtown and exits on the way to US-1 before driving along the east coast. The van continues along the east coast until the arrival at the airport where the van must be returned to the parking garage.

The Bloxman group goes through the airport and checks in for an express Delta flight. They go through the terminal and have some lunch there before exiting at the apron concourse where the plane is at. Once the group goes to the apron, they board the small plane and inspect the plane for any damage and fuel. They fuel up the plane and wait for several hours before leaving the apron. By the time the plane is scheduled to leave, there are no passengers wanting to fly. The plane goes to the nearest runway and takes off, heading north. By 3:00 PM, the plane arrives at the airport in Canada, and the group leaves the plane through the airport. The group waits for the bus to arrive and steals the bus to go to the nearest car dealership.

At Ste Martine, the group goes to the car dealership and rents a van before settling down in a house nearby. They rent a house and unpack before sleeping.

Meanwhile, the police family is getting ready to fly to Canada to chase after the Bloxman group. They get ready and head to the airport at the beginning of the night. They check in the same way as the Bloxman group and explore the airport. Eventually, they enter the plane and start flying the plane overnight. Midnightlion53 takes the lead on flying.

MIDNIGHTLION53 continued flying the plane overnight until landing at 3:00 AM. After that, they rent a car and start settling down in a house in Ormstown and exploring the house before heading to the police station to try stopping the Bloxman group. During the day, the police officers look for the entire search area for the Bloxman group and have found the group. When the groups meet, the police officers are surprised that the Bloxman group is trying to arrest the police. Eventually, the two groups fight before the Bloxman group runs away. After that, the Bloxman group robs all businesses in the area. After spending time fighting, the two groups split up and spend the last day sleeping in a house that they rented earlier before the flight.

WHEN THE GROUPS WAKE UP, they get ready and plan a flight to Sunshine City where the historic mansion and some important theme parks are. The Bloxman group goes first before the police chase about an hour later. The groups then return their rental car and take the bus to the airport to check in for the flight. The Bloxman group plans on stealing the themes from each theme park and riding all of the important rides for the death park construction.

Eventually, the groups arrive at the theme parks. The first destination for the groups is the Universal Studios Roblox. The main purpose for the adventures of Midnightlion53 and his kids are to chase and stop the Bloxman group from taking over the businesses and to rescue the kidnapped woman. However, the Bloxman group goes on adventures for two purposes though. The plan is to steal the Universal themes for the wedding and to ride the attractions to design a death park. The next plan is robbing other theme parks nearby such as Disney World.

The Bloxman group parks their stolen bus at the bus station and eats lunch at TODAY cafe. Then they look for places to rob in CityWalk and themes to steal from sections of the park.

The group robs several stores and steals food for free without purchasing in several restaurants. After that, they steal a theme from CityWalk and head to the main theme park. From there, they steal several themes and artifacts such as Production Central. They steal themes from Liberty City, New York theme section and the Wizarding World of Roblox section. They also steal themes from Jurassic Park and Sci-Fiction City. The Sci-Fiction City has themes that can help moon transport and moon construction possible as well as increased oxygen levels. Eventually, the Bloxman group checks in at Cabana Bay Continental and goes to sleep.

THE GROUP WAKES UP, ready to ride all of the attractions in the park. They start with the Walking Dead walkthrough attraction followed by Revenge of the Mummy. They go to the Forbidden Journey followed by Jurassic Park River Adventure. They also ride in the discovery center and explore the lab as well. They ride on all Sci-Fiction rides such as Back to the Future and Incredible Hulk. Finally, they return to Production Central where they ride the Fast and Furious attraction. The last and final ride is the Hollywood Rip Ride Rockit.

After riding all of the rides, the group writes a short summary of the experience and makes a design for the death rides based on the experience. The most scary parts of the rides are where the resistance passengers are going to be tortured or killed.

The Bloxman group leaves Universal and heads to Disney World where they meet Midnightlion53's police group and Disney World guards. They enter the vent and get arrested in prison before escaping and robbing the entire park quickly.

**L**ater after robbing several theme parks in a day, the Bloxman group plans on flying across the Atlantic Ocean for the first time to get more goods for the wedding. They get ready and head to the airport to check in with British Airways. From there, they go through the terminal and enter the gate. They inspect the plane before taking off. After the inspection, the group waits for an hour before taking off. When the plane leaves the gate, there are lots of passengers this time who need to be safe in case the Bloxman group takes over enough land that they create the Bloxman Empire. The pilots announce the passengers to vote for the potential Bloxman Empire, with many passengers agreeing and some fighting.

When the plane arrives at the International Airport, everyone gets off and finds a way to the arrival. In the terminal, there are no signs for the arrivals. At the front of the terminal, no arrivals place can be found, only the departures and the security checkpoint. Anyways, the Bloxman group robs several businesses at the airport as long as no security is watching.

It turns out that the arrival location is separate from the rest of the terminal. There is a bus provided to transport arriving passengers out of the airport. The Bloxman group heads out of the bus station located in the tarmac and steals one of the buses. Dr. Bloxman drives the bus towards the bus station and picks up several passengers. From there, he asks the passengers to vote for him in the next election. Basically, he wants his third party to win. However, the buses in the tarmac are unique compared to the rest of the transportation throughout the kingdom. The buses

in the tarmac that transports arriving passengers are LHD instead of RHD and have the Nevada license plate. Also, the tarmac is the only place in the kingdom to drive on the right-hand side as the airport is considered to be an international zone. Every tarmac entrance has signs that tell vehicles to drive on the right side of the road. Eventually, the bus arrives at the arrivals terminal building of all terminals, and the Bloxman group heads to pick up their inventories.

From the arrivals terminal, the Bloxman group heads to the monorail station and steals one of the trains. Dr. Bloxman controls the train and allows passengers in and out of the train while asking them to vote for him in the next election. The train goes to several attractions around the airport until the group plans on robbing HeidiLand Theme Park.

Eventually, the group arrives at the HeidiLand Theme Park and checks out the park. First, they go on the rides first and write an experience note about it to design the rides for the death parks. The rides at the park are scary though with the group noting the scary parts of the rides such as the drops as a design to change the course of the ride. When the ride course is changed, the drops and scary parts of the ride would cause injury and death to the passengers, being tricked and forced after being asked to support or not support Bloxman.

This means there are rules and ways to torture and kill the resistance. First, the group asks anyone to vote for Bloxman in the next election. If someone plans to avoid voting for Bloxman, the group would trick the enemy into a fun theme park until finding out that the ride is dangerous and can cause injury. Whenever someone dies, the Bloxman group and gang always happen if the dead victim is against voting for Bloxman and his plans.

The next step is to rob the entire park. The Bloxman group steals many precious stuff from the park and plans on decorating or using them in the moon wedding. They also steal the

parade structure as well and replace that with the Bloxman theme and the plans for the moon wedding. Eventually, the Bloxman group starts the parade for more than a hundred pounds and asks everyone to vote for Bloxman. After the parade, the group leaves the park for the day and checks in at the nearest hotel to settle down, eat dinner, and go to sleep.

WHEN THE GROUP WAKES UP, they get ready and plan on stealing many things from other attractions around the airport and the theme park. The first destinations are the snow attractions before the group robs the rest of the attractions. After the attractions are robbed, the group has a lot of adventures to go to before the moon wedding comes.

The group heads out of the hotel and makes their way to the train station. From there, they head to the Ski Resort where they enjoy the activity there. They ski down the hill with some stunts over there. After that, they go to the store and start stealing both the cash and the boards. They then plan on constructing another ski resort designed for torture and death based on the experience today. They exit the ski resort and head to the train station.

At the train station, the group waits for the train and steals one to go to bobsled rides. The group controls the train and stops at the bobsled station. From there, they head to the bobsled rides and rides down the slides. They also rob some stores nearby as well. After visiting the rides, the group plans on constructing slides and using bobsleds to torture and kill any resistance people. After that, they go to the train station for more destinations.

The group visits the train stations several more times and visits more attractions around the airport. They visit the aquarium and the zoos to steal some pets and animals for the moon wedding. They also visit other attractions as well to steal more goods.

Meanwhile, Midnightlion53 and his kids are on a trip to rescue the kidnapped woman. They keep looking for the Bloxman group ever since. One time, the kidnapped woman is almost rescued when the rest of the Bloxman group gets arrested and goes to jail in the security building in Disney World. From there, the kidnapped woman is finally free and tries to look for the rest of the family. Just when she sees Midnightlion53 and his family, the Bloxman group kidnaps her from the back and aims the gun at the police family. This causes the guards to go after the Bloxman group and try arresting them. However, the guards fail to catch the Bloxman group as they rob several stores and attractions before running away. Midnightlion53 and his kids were on a very close call as the Bloxman group escaped to the airport for more adventures.

Eventually, Midnightlion53 and his kids are able to track down where the Bloxman group went using security cameras across the public areas around the thieves.

AFTER VISITING THE ATTRACTIONS, the Bloxman group wakes up from their hotel and plans on going to epicrsxxx099811's first job to steal a bus to take random passengers to the moon wedding. They get ready and check out of the hotel before going back to the airport.

At the airport, the group checks in and finds a plane to Mayfield Airport. From there, they go to the gate and hop on the plane. On the plane, the passengers are ready to fly and plan what to do when they get to the city. They plan on stealing the bus for several purposes. When the wedding comes, the group is planning to invite all of the Bloxman gang members to the wedding as well as some random people, especially witnesses to the wedding. In the wedding, the gang is going to make strict rules, so no witnesses can crash the wedding. Those who attempt to crash the wedding will either be kicked out or get arrested into moon prison.

When the plane arrives at Mayfield Airport, the Bloxman group gets off the plane and explores the terminal. They find that some businesses are still closed and that the terminal is generally empty. Using the empty terminal as a benefit, the group sneaks in and steals many goods and money from the stores and restaurants with hardly any security watching.

When the group arrives at the terminal, they find a parked bus and steal it. They take the bus to the bus depot and look for several buses to steal. They explore the bus depot and rob many of the stores and restaurants there. They also rob the ticket machine as well. Eventually, the group explores the city and robs many of the businesses before stealing the bus. Once they steal the bus, they take a stolen trip to London where they keep it in a secret garage and check in at the nearby hotel. From there, they rent a car and go into the hotel to go to sleep.

Meanwhile, Midnightlion53 and his kids are watching security cameras to track where the Bloxman group head off to. They watch them in public places such as the airport and in the streets where they observe the group committing many of the serious crimes.

ON JULY 27, the group wakes up again at the hotel and gets ready to go downstairs. They dress up in their Bloxman uniforms and head downstairs to eat breakfast. After that, they head out of the hotel and spawn the rental car. The rental car looks like a light blue sedan. From there, they drive around places before parking back to the shopping center. From there, the group plans on spending the morning stealing and robbing the most important tourist attractions.

The group walks off and crosses the street to visit the Big Ben. From there, they enter the clock tower and rob the buildings to gain access to the clock and to learn how to govern the Bloxman nation in a very strict way. This is where most of the strict rulers were born in the 19th

century and earlier with limited power. One of the strict rulers became isolated from the rest of the world, obtained unlimited power, and banned unauthorized building because of an isolated island in the skies and the legend that there was a void below the island. After examining the history, the Bloxman group plans on using full power like that to prevent anyone from building on the moon or just building anything against the Bloxman dictatorship. They also take out the clock and plan on using it later in the future when they need to. This would control the earth's rotation just like a giant did back in Liberty City in 1863. This could be useful to win battles and plan on making the Bloxman Empire that is going to be very powerful.

Then, the Bloxman group crosses the bridge to the London Eye and climbs up there before visiting the club to get some criminal energy. From there, they head to the bank in the northeast section of the map and start to rob the bank without getting spotted by the cops. After that, they visit other tourist attractions and important businesses to rob them.

After a long time robbing the city of London, the Bloxman group returns to the hotel and checks out before sunset as they forgot to check out in the morning. After that, they head to the underground subway station and wait for the train to arrive. The train arrives at sunset, and the group heads off to Rozlyn in the Netherlands. The group sleeps in the train overnight.

Midnightlion53 and his kids are able to track down the Bloxman crimes using security cameras in public places. They see them robbing and looting for the moon wedding.

THE BLOXMAN GROUP WAKES UP when the train at Rozlyn South. They plan on stealing the cargo for goods for the wedding. When the train arrives at Rozlyn Station, the group gets off the train and heads to Rozlyn Depot to spawn a freight train. Again, this is one of

epicrsxxx099811's favorite jobs, so epicrsxxx099811 is driving the freight train. The group enters the depot and uses the spawner to select between passenger and freight trains. With this, the group spawns the train and drives to both passenger and freight stations to both kidnap and pick up cargo. Next, the group moves the train towards Dockside Freight with the time being so quick while on the way. This means that the trip from Rozlyn to Dockside Freight almost takes half a day to complete because of the fast earth rotation. Eventually, the train slows down and arrives at the Dockside Freight where the group gets off and works on loading.

The group opens the freight cars and takes out both the cargo and kidnapped passengers from the freight train to the cargo ship. The process takes place during sunset where many of the cargo and the kidnapped passengers get loaded into the ship with the cargo box.

After filling the cargo ship, the group is ready to head to Haulbowline located in the North Sea islands. The voyage takes place overnight where the group plans to sleep. They explore the cargo ship and look at the cargo before heading inside and sleeping.

Meanwhile, Midnightlion53 and his kids are able to track down where the Bloxman group goes. They see that they steal cargo from the freight train and load the cargos from the freight train to the cargo ship. The cargo ship also has security cameras as well, so the family is able to track down where the Bloxman group is. The kidnapped woman is also located in one of the cargo boxes along with other kidnapped passengers and some cargo.

In the boxes, the passengers easily fall asleep in the boxes, locked inside. Some of them are awake, trying to escape from the boxes but trapped inside. Some of the passengers do not have access to oxygen because of the cargo and other people around them are located in a small cargo. Some of the people die because they cannot breathe in the box.

THE BLOXMAN GROUP WAKES UP when the ship is close to the islands. epicrsxxx099811 takes control of the ship and sails towards the island of Haulbowline, which is the first destination for the ship. The plan is to deliver the cargo and kidnapped passengers to the island and trap them somewhere where no security can be found nearby. The plan is to also visit the government center and help plan for the moon wedding and how it will work.

When the ship arrives at Haulbowline, epicrsxxx099811 docks the ship and delivers the cargo boxes out. He uses the crane to unload from the ship and hide it somewhere in the forest. Dr. Bloxman then goes into the forest and takes out all of the boxes full of cargo and passengers. Many of the cargo boxes have goods that are important for the wedding. This includes food, clothes, and other decorations that might help for the wedding. While some passengers are killed in the boxes, other passengers flee from the boxes as soon as the cargo box opens. However, the Bloxman group keeps some of the passengers with the group, treating them like slaves.

After unloading the cargo, the group goes to the government center nearby to plan for the wedding. The wedding takes place on the moon and will take at least a day to set up by constructing both the church and the prison as well as decorating the wedding. The wedding also invites random people and all Bloxman gang members to the wedding. They all sit in the church, watching the forced wedding taking place on the moon. Tomorrow, the Bloxman group will improve and get a better airship since the current airship does not have enough power to fly to the moon. After planning, the group explores and sleeps in the building.

THE BLOXMAN GROUP WAKES UP, ready to improve the airship. The airship is going to be brand new and much improved. Not only does the airship have the ability to fly to the moon but

also travel around the world in record time than the current airship. Before the group goes out of the building, they plan on comparing the old and new airships together. At first, the airship looks like a normal ship until the ship can have adjustable propellers that cause the ship to have the ability to fly. Also, the propellers have to look like a normal one.

The Bloxman group heads out ready to get a new airship. They spawn the ship and the old airship together. They take out the airship parts that cause the ship to fly and transfer them into the new ship. First, the ship should be adjustable to take off and place on the flying parts. Next, the group adds extra parts, so the ship is able to fly to the moon. Then, they explore the ship and add controls in the captain room. The extra controls include flying up and forward. Last, the Bloxman group is finished with the airship and returns to go to sleep.

ON FRIDAY, the Bloxman group is ready to test the airship. First, the test should focus on controlling the ship like normal before using the flying controls. The group gets ready for the test and heads out to the dock. At the dock, they respawn the new ship and explore one more time. Most of the ship looks empty, so this is where the wedding cargo should be stored. The stuff in the cargo holds are mostly stolen from all of the adventures so far.

When the ship is ready, the group picks up some normal cargo and plans to deliver them to Ronne. After that, the ship leaves the dock and sails towards Ronne. The Bloxman group are thinking about what happens after the wedding. Eventually, the ship arrives in the docks of Ronne where the Bloxman group delivers the cargo and picks up another.

Next, the Bloxman group sails the ship to deliver cargo from Ronne to Gudjem Beach. While sailing, the group plans on taking half of the water from the beach since the moon

wedding is going to be dry and that the wedding needs the water. Eventually, the ship arrives at the beach where the group gets off and sets up the pipes to take water from the shore to the ship. They invent something that “drinks” the water, so most of the water goes into the ship. After that, the group is done with the ship being full of water supplies, ready for the next.

The next destination is sailing from the beach to Nexo where the airship should be respawned. The ship arrives where the group respawns the airship to make sure that the ship has enough fuel. Once the ship is ready, the group sails off the ship like a normal ship at first, sailing east. After a few kilometers east of the islands, the group is ready to take off and use the flying controls to fly the airship. They head towards Rockford Islands.

Meanwhile, Midnightlion53 and his family track down where the Bloxman group goes. They see that they are heading towards the Rockford Islands, which is the place where the family is going to deliver some cargo while trying to stop the Bloxman group.

OVERNIGHT, the airship continues to fly towards Rockford Islands. At 3:00 AM, the Bloxman group arrives at Greater Rockford Island. There, they park the airship and lock it there to look like a normal ship. They make their way to Airbase Garry to steal some air force gear. They fly the military plane from Airbase Garry to Greater Rockford Airport.

At Greater Rockford Airport, the group explores the airport and steals some gear over there, including air traffic control, as there is nobody to stop them. However, there are security cameras everywhere which helps Midnightlion53 track down the location of the Bloxman group. The group continues to spend time at the airport, stealing and robbing many of the features of the airport. This is used when the wedding comes when anyone lands on the moon for the wedding.

In the moon wedding, there is a contract where participants must agree to not crash the wedding and form a resistance in order to rescue the future bribe. Otherwise, serious consequences come, ranging from a decade of prison all the way to a death sentence.

After robbing the airports, the group spreads out and steals more airport features from several airports throughout the Rockford Islands. They also steal and rob the city as well, just like the riots and looting in cities. The looting becomes so easy as there is nobody to stop them with security relying on security cameras while social distancing.

After robbing and looting, the Bloxman group finds a hotel to settle in. Once the group arrives at a hotel in the center of Greater Rockford Island City, they break into the room and stay in the hotel for free. Eventually, the group settles down and sleeps.

ONCE THE GROUP WAKES UP, they are ready for the next adventure. Since some of the Bloxman gang members like anime and use their abilities to stop the wedding from crashing, the plan is to fly to Tokyo, Japan next. The group gets ready and goes to Greater Rockford Airport. Because the airport was robbed yesterday, they just go to the gate and spawn a Scandinavian Airlines plane. They get ready and let some passengers in.

By the time the plane is ready to go, there are only a few passengers in the plane. Eventually, the plane leaves Greater Rockford Airport and heads east over Russia. The group spends the rest of the morning on the plane. By 11:00 AM, the plane arrives at the airport, and the group gets off the plane where they eat lunch at the airport.

After lunch, the group rents a car and heads to the mountains first. They steal some of the expensive rocks in the mountains and take a view. After taking a view and stealing, they head

down and drive to Tokyo through the expressways where they begin with the suburbs at first. Eventually, the group arrives and starts to rob and loot.

The group parks at several parking lots and robs many of the businesses. The streets are more empty than before, causing street races to become possible, even during the day. Eventually, the group makes their way into downtown by looting the outer businesses first without any security nearby. In the streets, there are cameras everywhere, so Midnightlion53 can locate and track them down. However, the Bloxman group keeps moving and moving.

During sunset, the Bloxman group heads to the center of Tokyo and parks near the tower. They take a look at the glowing tower before walking to the restaurant. At the restaurant, they see nobody there. The restaurant seems closed, with the owner forgetting to lock the doors. However, the Bloxman group proceeds and steals the food. They dine in with the stolen food before going to stores such as the clothing store to loot some nice clothes for the wedding. Eventually, the group goes to the crosswalks and announces everyone about the upcoming wedding. After that, they head to the hotel where the group goes into the capsules and sleeps. Additionally, the kidnapped woman that Midnightlion53 wants to rescue is in the same capsule as Dr. Bloxman, practicing love and preparing for the wedding while epicrsxxx099811 is alone.

WHEN THE GROUP WAKES UP, they get ready and leave to go to Pacifico, San Andreas. They plan on flying in the morning, so that the plane arrives in the morning. The group also plans on sleeping overnight before ending up in the same morning as before as the plane is going to cross the International Date Line. They exit the capsules and head to the parked car near the tower. From there, they drive to the nearest expressway and head to the airport.

At the airport, the Bloxman group checks in and plans on heading to Pacifico. Since Pacifico is a small, important town, there are no direct flights to Pacifico. The group checks in for a flight to Los Santos instead. They head into the checkpoint where Midnightlion53 tracks down where the group is going. Next, the group waits for the plane to arrive.

A Fly-US plane arrives at the gate where the group gets in. They get in their seats and enjoy the flight. Since the plane is mostly empty and that they want to sleep overnight over the Pacific, they go into the first class seats and sleep as the plane enters the Pacific. As the plane goes through the ocean, the time is back from afternoon to morning.

Once the plane arrives, the group exits the plane and rents a car. They then drive out of Los Santos by Great Ocean Highway and head to Pacifico, which is located past Paleto Bay. From there, they rob and steal many of the expensive stuff for the wedding. Eventually, the group goes to a restaurant in Pacifico and eats their lunch there.

After lunch, the group heads south of Pacifico and through Los Santos until they reach Bloxywood, a city south of Los Santos. Bloxywood was the location where Los Santos residents temporarily lived after the destruction of Los Santos in the 1990s caused by massive riots when a gang leader tried to become a strict ruler and ban unauthorized buildings, just like The Founder. Another cause for the 1990s destruction was when co-founder CJ crashed a jet into Sky City Ruins, which caused the island where Sky City was to fall into Los Santos and crash, killing hundreds of thousands of people, with a forced evacuation of the city.

Now, Bloxywood is just a vacation city, home to street racers. This is where the Bloxman group steals more cars and wedding materials from the city while Midnightlion53 races for enough money for a flight to chase after the Bloxman group.

THE NEXT DAY, the Bloxman group wakes up and continues to steal more stuff from the city. Meanwhile, Midnightlion53 and his family track and run out of money, so they decide to join the street races to earn enough money to keep chasing the Bloxman group. After all, the Bloxman group manages to steal many goods from the place for the rest of the morning. Eventually, they head to the airport to catch a flight back to Robloxia.

At Robloxia Airport, the plane arrives with the Bloxman group stealing a random car from the airport to the space terminal as a final destination for earth. By the time the group arrives at the space terminal, they have everything needed for the wedding, including the airship. However, epicrsxxx099811 can be able to teleport anything to the moon. The airship is now used for the cargo while people can directly either use the rocket to go to the moon through the space station or just teleport using the phantom gem all the way to the moon.

Before all of that happens, the group explores the space terminal to check how it works. They head to the mission control station to launch several rockets before the night comes. During sunset, the group heads to the nearest hotel and sleeps there.

THE GROUP WAKES UP AGAIN, ready to find transportation to the moon. There is already transportation to the moon by rocket and space station, but that is not enough for the wedding. The Bloxman group needs to improve the transportation to the moon. epicrsxxx099811 has an idea. He has the phantom gem hiding during the adventure, so he uses it to create a teleporter. He flies up to the moon using the mask and creates another teleport, connecting the teleporters. This means that anyone can teleport to the moon and back to earth. However, the wedding is not ready yet. The airship must be able to fly up to the moon to carry goods for the wedding. The plan is

that the airship should have supplies that help with the construction of the wedding locations. This includes water and oxygen. The rest of the cargo belongs to the construction materials and the decorations for the wedding as well as other features to help, including security.

Eventually, the airship arrives at the moon with all of the stuff there. The group unloads the construction materials. They also unload oxygen and water to help hydrate and breathe on the moon. Things are also different on the moon as well. The moon has less gravity than the earth, so the group and the wedding members must be prepared to go high when jumping. The transportation must work as well, so the group goes back and forth through the phantom teleporters. The phantom teleporters work as well. Eventually, the group must also be able to set up prisons for anyone trying to crash the wedding. They also must track time as well by the sun. All times on the moon are eastern times since transportation comes from the east.

THE GROUP WAKES UP ON THE MOON, getting ready to start a big construction for the wedding. The wedding is going to happen tomorrow, so construction is the first thing to do. The group goes to the airship to unload the rest of the cargo before the construction starts. They also track time to make sure that the construction starts at 6:00 AM.

The group starts to construct a church. They use bricks and materials stolen from the Harriston metropolitan area to build a church design. Before that, they mine moon rocks down and construct a basement designed for battles against wedding crashers. The basement is going to include several hazards such as bad weather and the battle. The entry to the basement is going to look like a normal church floor between the seats and the stage. Bloxman can be able to open the secret door by stomping on it with the bribe chain to keep the bribe.

After the construction of the church is done, the group adds some seats and the stage. They also decorate the church by using stolen merchandise from stores across the world. The decorations include fabric decorations, the food, and the cake. The decorations also include some of the stolen paintings and art as well to attract and make the wedding clean.

After constructing and decorating the church where the wedding takes place, the next step is to construct a prison. The group uses bars and blocks to build the prison that looks like a +. After that, they test out each cell to make sure they work properly.

Meanwhile, Midnightlion53 and his kids finally go home before traveling to the moon. They use security cameras across the space terminal to locate the group. However, the group is nowhere to be found after they teleport to the moon. This means that the family guesses that the group is either in the space station or the moon. The family then goes to find the group and to rescue the kidnapped woman. They also try to stop and arrest the Bloxman group and take back all of the stolen merchandise and bring them to the world.

**W**HEN the wedding structures such as the church on the moon have been constructed, Dr. Bloxman and epicrsxxx099811 invites several friends and owners of each part of the wedding items to the wedding. They believe that some may be willing to go because they get to go to the moon while others oppose the wedding because it horrifies them that they are getting invited by the villains. Some might even come just to rescue the bride and help Midnightlion53, but that would take a lot of power for that.

At the moon, the two officials of the Bloxman kingdom continue to invite more people from around the world to the wedding. The church capacity is small, so not everyone known can attend. Everyone the officials know as well as some residents of the Bloxman's state can go to the wedding except Midnightlion53 and possibly his kids. This is because Midnightlion53 is the only enemy to the officials since he is the one really trying to take down Bloxman and prevent the wedding from happening. This is only the plan that is generally happening for the day.

The officials at the church make a plan to travel places. They already can go anywhere faster than what anyone else can do due to the powers of the phantom gem. They can teleport to and from the moon and also back to earth. However, they cannot teleport anywhere else in the world unless they develop a new technology allowing any officials or enemies to be teleported

anywhere either friendly or dangerous. The officials also must come up with a plan to expand the teleportation and program the phantom gem to teleport specific people invited to the wedding, so everyone can see in horror. The phantom gem is also the one that is strong, so anyone who tries to save the bride such as Midnightlion53 is going to suffer and have to battle.

Speaking of battle, Dr. Bloxman and epicrsxxx099811 mines the underground and turns the layer below the surface of the moon in which the wedding area is going to take place to a big battlefield with scary props included in it. They also come up with a trap. Those trying to crash the wedding and save the bride by heading to the back of the church are going to be trapped. The two leading officials of Bloxman then cut parts of the flooring and turn them into the trapdoor. The trapdoor looks exactly like an ordinary floor and is scripted to open down once any wedding crashers such as Midnightlion53 comes and steps on it. Once the trapdoor is opened, the enemy is going to fall down the trap and land on the next floor. The amount of height between the door and the ground is so tall that the enemy can take fall damage, which helps Bloxman fight quickly to defeat the enemy. Plus the phantom gem powers have the strongest enchantments of all, so anyone who tries to stop the wedding is going to suffer a bad failure.

After coming up with a plan and building the underground trap, there must be a way for everyone to exit the underground battlefield. Dr. Bloxman forgets that once the trapdoor has been opened, the bride falls down in a chain that hangs down above the battlefield ground before the chain goes up before the battle begins. Once the battle is over, the enemy is then either teleported or taken into prison, where he or she would be spending the whole life there.

After coming up with security plans and inviting friends and enemy owners to the moon, Dr. Bloxman and epicrsxxx099811 returns home quickly and sleeps for the night.

ON THE SECOND DAY OF PLANNING, the two wake up and get ready to either return to the moon or stay at home. Since there has to be several kidnapped people on the airship, the leaders and the bosses plan to get their friends to look like criminals and kidnap random citizens as well as the owners of each stolen piece for the wedding. The main plan is to find ways to kidnap and actually invite everyone Bloxman knows to the wedding to fill up the church seats.

However, Bloxman does not want any enemies to come to the wedding to cause trouble. This is because some citizens might have tools and weapons that can help crash the wedding. In order to prevent that from happening, all inventory except essential items are to be taken away and stolen by the officials. Several Bloxman soldiers are also coming and act like security guards to prevent enemies from coming to the wedding, mainly to save the bride.

The plan is to spend three days in three sections of the world to invite and kidnap those who are invited to the ship. Midnightlion53 is not accepted into the wedding since he is expected to cause trouble. However, Midnightlion53 finds ways and manages to follow wherever the ship is coming. It turns out the bride is still with Dr. Bloxman and epicrsxxx099811, so those trying to enter and get too close to where the three live, they are escorted out of the Bloxman area by the Bloxman army, some of which have phantom gem powers, especially near the capital.

The plan calls that on the first day involves spending half of the day near Robloxia and areas near the Atlantic overall. The second day is going to see the airship picking up everyone Bloxman knows deep outside of Robloxia. This includes the places around the world Bloxman has been to. The final day is basically the return to Robloxia before going to the moon.

After making the second plan and combining that with the first one together, Bloxman and epicrsxxx099811 return home where they go to bed and sleep for the night.

AFTER PLANNING for security and picking up those invited to the wedding, the partners get ready to start the airship and begin picking  $\frac{1}{3}$  of the attendees to the wedding. They go to the airship and begin to pick up the top Bloxman officials first as well as some of the soldiers. They only travel in areas in the state of Bloxman. They wander around and explore the state while trying to pick up random Bloxman residents throughout the state that they can trust.

After going around the Bloxman state, the airship goes to places the officials have been there before during their big vacation. They steal additional goods and kidnap some citizens as well as meeting the owners of the materials for the wedding. However, the owners do not feel good about the thieves. However, the thieves either kidnap the owners or let the owners in. Once the owners get in the airship, they plan to get their items back and help Midnightlion53 crash the wedding, but that would not be enough to defeat the hosts and its phantom gem powers.

Once the airship has reached halfway in Robloxia, the thieves commit some crimes just to get the wedding attention, and most citizens and residents notice the big airship. Some of the residents even see the kidnapped bride who seems to want to get saved. Midnightlion53 at this point follows the airship to try to save the world. However, the airship can still go high and has some weapons to defend any enemies and kick them out of the ship.

Once the airship hovers close enough to pick up some passengers, Midnightlion53 sneaks in with his kids. He tells his kids to help fight against Bloxman and save the world and bride. At first, Midnightlion53 looks like an ordinary attendee who is actually accepted. Once the officials look close enough, they kick Midnightlion53 and his kids out of the ship for good.

After kicking Midnightlion53 out of the ship, the officials all relax in the ship. They plan to spend the next day overseas. Last, they go to bed and sleep while flying the ship.

ONCE BLOXMAN AND EPICRSXXX099811 starts their day once again, they get ready to go deep into their adventures. epicrsxxx099811 takes the role of staying at the moon while Bloxman goes out to the world to pick up more attendees on the airship. The whole plan is based on what is already planned days before that. Dr. Bloxman hires several of the new workers to help him pick up and escort random attendees as well as property owners to the airship pickup site.

Once the two get ready, epicrsxxx099811 returns to the moon where he would spend the whole day there. He makes sure that he checks and assigns where the people would sit for the forced wedding. This is in order to prevent any interruptions of the wedding and to make sure that they go as planned. The phantom gem also helps power up and prevent any invaders from crashing the party. epicrsxxx099811 also spots some other places and prison to where enemies can potentially go while trying to save. This is basically a good way for moon security.

Meanwhile, Dr. Bloxman then collects better items from the ocean along the way to areas like Europe, which is the first destination on the second day. He starts from the biggest cities and takes citizens that Bloxman or the property owners knows to load them on the airship. The ship then flies off the continent and heads towards other parts of the world. There are not many places in the world that would seem better due to the majority of the world being developing countries. These are poor countries where there are resources Dr. Bloxman would get impressed with.

After spending hours and hours in developing countries. Bloxman finally makes it to the Far Lands mountain and its range, finding stuff with lots of values. This is where items there may be stolen just for the quality of the wedding. Bloxman then flies away in the airship.

The next destination and possibly the last before returning to America are the east Asian countries such as China and Japan. Dr. Bloxman then picks up people from these countries and

the owners of one of the stolen items to the airship. Finally, the airship continues off for its last day before the wedding starts. It flies across the Pacific Ocean back to America.

This is where Dr. Bloxman sleeps overnight while the airship is flying. epicrsxxx099811 settles down at one of the moon houses and also goes to sleep for the whole night.

THE TWO WAKES UP and plans on for the very last day of pickup. This is also the last day the pickup is going to happen before the wedding. The pickup is going to take place in most of the United States and Canada. It has very important places where some of its items are stolen.

After making adjustments to the original plan, epicrsxxx099811 spends the whole day at the moon. On the moon, there is no day sky, so it is night the whole time. However, anyone on the moon, especially the wedding area and a Bloxman army base uses the eastern time to check the time. The only benefit to the all-day night is more hours of sleep epicrsxxx099811 gets.

Dr. Bloxman first arrives in Bloxywood, Los Santos, and Pacifico as well as many other towns and cities in the state of San Andreas the airship goes to. This is also where one of many of the important items for the wedding has been stolen. Bloxman picks up the owners of each stolen item and loads them on the airship along with the friends of the owners.

Then, Bloxman loads once again on places gradually east of San Andreas. This includes the desert to the south and the mountains to the north. There are not many important places to go to until passing the state of Bloxman. The state of Bloxman is where the journey all started. Most of the airship has been filled up by either kidnapped or not kidnapped passengers.

After exploring the whole western half of America, the airship still keeps floating around the place, looking for more passengers to get picked up. However, there are no passengers or just

anyone in sight, making the pickup hard at this time. There are many other places that have a lot of population for the passengers to get picked up that have been forgotten on the first day.

In the southeast, there are many places that have not been picked up yet, especially the Ultimate Driving states. Even though many places are mostly empty out there, Bloxman often runs into houses and sometimes reckless citizens and loads them on the airship. This is the day where the end of the day sees that the airship is going to the moon soon.

Indeed, the airship goes to the moon with the airship mostly full. Bloxman takes care of the passengers and makes sure they behave. They behave most of the time, even if they are not friendly at all since some plan to betray Bloxman in order to save the bride.

The airship continues a long journey overnight to the moon. epicrsxxx099811 prepares for tomorrow by setting up the stolen items and then sleeps for the night in the shelter.

ON THE WEDDING DAY, the airship arrives with lots of passengers. Dr. Bloxman meets and greets epicrsxxx099811. He also meets lots of passengers, especially the owners of the stolen pieces for the wedding. However, the owners are not friendly at all as they all want their stolen items back. The phantom gem helps the owners to not resist and save their items. The setup is not done yet as they continue throughout half of the morning, preparing for the wedding.

Dr. Bloxman leads the attendees into the church. In the middle of the day, the wedding officially starts with Bloxman and Midnightlion53's bride getting married while forced to make a divorce with Midnightlion53. The bride still expects Midnightlion53 to come save.

Everything about the wedding is ready. The church bell keeps ringing from 11:00 AM to noon. At noon, the wedding is scheduled to start with a big cake lunch and other feasts ready. At

11:30 AM, the wedding is still going very fine at this point. The Bloxman attendees are almost ready for the wedding. The Bloxman guards then become too busy to guard the moon since they are getting ready to get inside the church, leaving nobody in the moon outside of the church.

Midnightlion53 suddenly comes to the moon with his kids. He arrives at the moon around 11:45 AM, 15 minutes before the wedding. He is surprised to not see any guards, so he sneaks into the church. Once the three get in the church, they act nice at first. At 11:55 AM, the three walk towards the church podium as the attendees watch. epicrsxxx099811 does not notice until he notices that Midnightlion53 and his kids come to save the bride. At noon, epicrsxxx099811 opens the trapdoor with Midnightlion53 and his kids falling down, getting hurt in the process.

Dr. Bloxman continues with the wedding as usual and kisses the bride. Then, he deals with the crashed wedding and brings the bride down to the pit just above the ground where the three enemies land. Bloxman says, "Midnightlion53 and your kids, you have no role in helping the wedding and instead crashing it. Now you are to face a big punishment". The battle is about to begin with Bloxman's roar and the bride going up to the surface as Bloxman throws.

Dr. Bloxman and epicrsxxx099811 teams up against the three enemies and uses their most powerful weapons to battle. Midnightlion53 has his police skill with kids doing similar. The attacks Midnightlion53 makes is not enough to defeat the two Bloxman bosses. Instead, the two bosses make several explosions, defeat the three, and send them all to prison. As a result, the wedding turns out to be successful, with the bride now becoming a forced wife of Bloxman.

**D**r. Bloxman, epicrsxxx099811, and the wife returns home for the first day that the wife is forced to live in the Bloxman state. Midnightlion53 and his kids are in the individual prison cells, meaning they cannot interact with each other. The prison cells back on the moon are also strong with phantom gem security. This is the new era of Bloxman as there are plans to keep the wife and develop the phantom gem even more.

During this time, Bloxman and epicrsxxx099811 began the process of developing the phantom gem even more. They go to the lab to adjust the powers of the phantom gem. They want the gem to perform even better and play a role in taking over the whole continent. Bloxman then comes up with a name of the Bloxman Empire called the Oder Empire. He changes the name of the current small country of Bloxman into Oder. This allows promotion of the Bloxman citizens finding a date and dating virtually, also known as online dating, or Oder for short. Bloxman then learns the main purpose of creating his own empire and spreading influences to the world.

With the main purpose of creating an empire, the phantom gem needs to develop even more. Currently, many police officers from all the states surrounding the Oder state manages to invade the capital of Oder. Bloxman names the capital of his state Metropolis. Metropolis is the good name of naming the capital of an empire, since it is planned to become the biggest city and

the military base at the same time. The plan for Metropolis is that the main downtown area is where Bloxman and his top official resides along with an airport, a hangar, an office, and a large space to the south that have natural villages along with the village tribe. The areas surrounding all of that are called the Metropolis suburbs where most of the Oder citizens live in order to help keep the Oder state from another invasion to prevent enemies from saving their state back.

After planning to expand Metropolis, the two top officials gather the materials to build and expand Metropolis. However, a construction company for the Oder state has been founded by one of the members of the Oder state, so Bloxman does not have to worry about building. All he has to worry about is developing the phantom gem even more that is designed for combat. He also forgets about the new wife that needs to go to prison while Bloxman and his best friend gets busy developing the phantom gem even more. The two leaders of the Oder state and kingdom return to the lab and watch the gem develop just a little bit. They also have to worry about the construction performance in the expansion of Metropolis and wishing to expand the fleet of anyone supporting the state, so the state can expand into one empire which can divide that one into several states such as two states as well as more than 50 substates/territories.

This is the first day of developing the phantom gem even more and not the first day to just discover the development. The main purpose of the development for today is to double the power that the gem currently holds. Currently, the gem is able to make epicrsxxx099811 fly at a very fast speed and still makes the weapons stronger than the original strength. Now the gem is experiencing a strength enchantment that causes all of its powers to become stronger.

With the phantom gem gaining two times its original power, Bloxman and his best friend returns home, brings the wife home, and sleeps together while messing around.

AS THE MORNING COMES, Dr. Bloxman is having fun with his new and stolen wife. The response of the wife is that she wishes Midnightlion53 should be able to invade Bloxman's area and save the world. However, Bloxman wants the phantom gem to just expand its powers beyond the current ones by the end of today. He wishes that the gem can power up diseases to make them friendly to the Oder officials and citizens while being able to infect the rest of the world. There are plans to make the vaccines with the phantom gem materials that is quick to make which is not about poking but just eating food and drinking with phantom gem materials in them.

After coming up with a plan to finish the development with its full potential, Bloxman and epicrsxxx099811 goes to the lab and adjusts the gem once again. The wife is sent to prison during work hours just north of the airport and east of the runway area. First, the lab workers of the lab develop the gem and program it. The gem is now programmable and simple, meaning that the gem can be scripted to power everything and respect anything within the Oder state or Oder kingdom, which has interchangeable terms. The rest of the world is basically a threat to the Oder kingdom. However, Bloxman believes that new kingdoms of similar dictatorship that once fell before and can rise again may become friendly to the Oder kingdom. As a result, the gem is then scripted to become friendly to specific countries such as Germany, Italy, and Japan. Russia may also be programmed too along with former Soviet Union states in order to reunite them, and that a new facism can support communism under the Oder powers and completely out of freedom.

The two leading people of the Oder state take lunch with the gem vaccine and give the gem a chance to spread the content into other people surrounding Metropolis.

After the lunch vaccine, the two officials then continue working and work to replicate themselves, especially epicrsxxx099811. The phantom gem is getting programmed to produce a

duplicate version of epicrsxxx099811. That means everyone would get confused on which one is the real epicrsxxx099811. Basically, Dr. Bloxman is also making the phantom gem make the top leaders of the Bloxman state as well as specific countries become the admins of the world.

The admins of the world can do the most powerful things than just leading. They can become any figure, including a huge robot. Once a figure is defeated, the admins can still work in their powered form, having the ability to force friends to betray and teleport them in a place that is not safe. In fact, the admins can even disguise themselves as their villains such as the well known Midnightlion53 and any other world leaders and government members.

With Dr. Bloxman being fully vaccinated, he takes his wife out of prison and returns back home to have a good night. He finally have sex for a lot of times, thinking of beautiful, even making that happen, and end up sleeping after peeing on the body and flowing to the bed sheets.

NOW IT IS TIME TO TEST the phantom gem's full powers. Dr. Bloxman and epicrsxxx099811 wake up and have a good breakfast before sending the wife to prison. From there, they go out there and test the powers of the phantom gem. This does not happen yet until later in the day, but there are plans to test the gem in three or four days depending on the performance of the gem. Since Dr. Bloxman is so smart, his predictions are expected to be 99.99% accurate.

Dr. Bloxman and epicrsxxx099811 goes to the lab and gets out the gem. All they need to do to power the gem to its full potential is charging it at the lab, being programmed to spread its influence to anything created or modified at the lab as well as the whole Oder state.

Now Bloxman and epicrsxxx099811 begin with the simple things first. They test out the gem the same way as they did before. They work together. Bloxman then drives to the hangar to

see what needs to be powered. There are a lot of robots and vehicles to be powered, so they can become two times as powerful and safe for the Oder members. Bloxman sees that the gem works on everything he owns, just beyond what he programmed, meaning that all of the mistakes and unexpected surprises Bloxman sees are nearly all positive for them while becoming negative for the rest of the world. Most of the predictions for powered items are correct for Bloxman.

Bloxman and epicrsxxx099811 take a break from the test and grab some lunch by the front of the airport. They bring them home and eat in the dining room.

After lunch, the two return to the test and continue throughout the day. At the same time, Bloxman is on his computer creating a replica version of his home in his own game while his friend continues to test by taking down the police. epicrsxxx099811 continues to attack lots of police coming into Metropolis and lures some of them into prison. After luring, he continues to test the new strengths and power up nearly everything he has. In fact, any food that can be eaten can double any health benefits by adding a small amount of phantom gem materials.

As Dr. Bloxman is done simulating his own game, he plays the game and plans to test out on the third day. For now, he just has fun playing the game and living a simulation as if the area has expanded throughout the whole continent as the Oder Empire. More like that soon. Bloxman also begins downloading a new game about the simulation of nations. The simulation takes a lot of time to download but spends some download time speeding up the pace by the premium speed downloads. That means the game is about to run soon. Everyone is prepared for the game.

The game is basically about anyone trying to take over. This is practice for anyone trying to take over the world although not realistic. Bloxman also adds some mods that can potentially simulate the goals of Bloxman and make them into reality anytime soon.

During the game, the session takes place at the present day with the time rate 72 times as fast as the current time. That means one game day is equal to 20 minutes. Sometimes, lag causes the game to become as slow as 24 minutes per day or even 48 minutes, depending on the traffic and the internet connection on average for everyone. Every country is allowed to play that game and is good especially for the Bloxman state. Everyone there likes the new game.

However, only a portion of the game is going to be simulated for tonight. The rest of the game is expected to be completed by the third day though. The only portion of the game that is to be completed tonight are the basics. There is a good start though. Dr. Bloxman downloads lots of mods to add the phantom gem, which makes his account overpowered like in reality.

After downloading the mods and learning how to play the game by the 3rd day, Bloxman and epicrsxxx099811 prepare for the night. Last, they go to bed and sleep for the night.

ON THE SECOND DAY OF TESTING, Bloxman and epicrsxxx099811 wakes up and prepares to test out the new powers of the phantom gem. For example, this allows anyone within the Oder state to not worry about diseases since the phantom gem does protect its people from getting sick and not feeling good. However, the gem does make diseases two times as severe for its enemies such as the police officers constantly invading Metropolis from the southern border.

After checking on one new power, the two top officials explore their land and touch as well as sneeze against the enemies such as the police and some US citizens. As a result, those who are infected with any disease are sick and feel like they are about to die.

The phantom gem does either protect or harm people who have germs. They power the germ and program to either help or harm the person affected depending on the relationship of

Bloxman. If Bloxman sees anything as a friend, the germs would protect and help the friends live much longer and healthier. The projected years to live from birth has now doubled or longer. The Bloxman residents are expected to live for centuries rather than decades. Dr. Bloxman and his friend epicrsxxx099811 are expected to live for millions of years or possibly forever. Meanwhile, citizens from the outside world who are enemies with the Bloxman people have either kept their current time to live or lowered. With the phantom gem variants of any disease, they are more contagious and way more deadly, which leaves long-term effects all the way to death.

After checking the program and its results from the phantom gem powers, the officials have another lunch at the airport since the food there is closer rather than at home. Then, they test out the new powers again by taking the wife from prison and bringing her home. Bloxman then spends the rest of the time having sex all the time until coming up with another test.

The test continues. The rest of the day is basically about replicas of epicrsxxx099811 and other figures of the top Bloxman officials. epicrsxxx099811 uses his phantom gem powers to make several replicas of himself. As a result, police do not know which epicrsxxx099811 is real. They just pick a random epicrsxxx099811 which is most likely fake. The same applies to other figures such as Bloxman and his items in his inventory as well as in the hangar. That means the two are growing their powers to the point that they feel like they are god and that they are the admin of the world. Because of this, Bloxman wants to lead the world in some way.

This brings again to the concept that the developed world is controlled by a few empires of dictatorship with the Oder Empire controlling the Western Hemisphere and several others controlling the east while the developing world remains independent for now. After coming up with a concept, the two top officials are happy with their plan and go to sleep for the night.

ON THE THIRD AND FINAL DAY of testing, Dr. Bloxman and epicrsxxx099811 wakes up and gets ready to mostly do a simulation instead. They plan to first spend the whole morning and possibly the afternoon completing a simulation game to make the Oder Empire in the game. The simulation of destroying Metropolis is coming in the afternoon but does not affect reality. It is just a plan to compare both the simulation and reality of taking over the world.

Dr. Bloxman starts the game on his computer and invites epicrsxxx099811 into the game. Next, he starts a new country right at the center of the United States and calls it the Oder land, or any term that comes in before the empire. From there, Bloxman adds phantom gem mods to the country and adds the population of the state and its soldiers. He gives the powers to everyone, so there is a good chance the Oder country is going to turn into the Oder Empire later on.

The game observes that several police officers and American soldiers are constantly in the invasion of the southern border of Oder and is invading Metropolis from the border, mostly in the village. The two players do not have a hard time defending the border as the gem easily kills off the police and makes them sick. Most of the deaths are not caused by combat but the gem diseases that the enemies face trying to take back Oder despite the land being small.

Oder is not going to be small forever and is planned to span the whole continent of North America, combining the former United States and Canada. Mexico may or may not become part of the Oder Empire but lends towards keeping its independence since it is part of Latin America, the part of the Western Hemisphere that is made of all developing countries.

The players make good progress at expanding Oder beyond its borders and invading many important parts of the United States. By the next hour, Oder becomes big enough that it becomes the Oder Empire and spans from coast to coast. Canada soon follows, becoming part of

the Oder Empire and soon grows at its peak. The Oder Empire is not the only empire as other similar empires appear growing. Germany controls most of northern and central Europe, Italy controls most of southern Europe and North Africa, and Japan takes over many parts of Asia. That means nearly all of the developed world is controlled by one of the four empires, with many other countries being considered developing countries. Later in the game, the four empires take turns taking over the entire world. By the end of the game, 99.99% of the world is taken, and all but a few isolated areas are under one of the four empires in the world in the game.

After the game is over, Dr. Bloxman and epicrsxxx099811 move onto the next game of their own, testing the identical powers of the phantom gem. As a result, all of the tools and items are capable of destroying all parts of Metropolis: the “normal” rock can destroy anything, the lightsaber can do the same, a fast rocket launcher being powerful, etc.

Using all of the tools and weapons, the players mess around and use a fast launcher to destroy village buildings and trees. They like the reaction to the tree and the collision of the wall being similar to the test in real life during a smash round between enemy police. Modern shelters are more resistant to rocket launchers but can be destroyed by rocks or lightsabers.

After playing the game that Bloxman copied from reality, he and epicrsxxx099811 get ready for the night. They eat their dinner, plan for an hour, and sleep for the night.

**M**EANWHILE, everyone in the United States is so shocked that Oder stole many important items for the wedding, even taking away the family of Midnightlion53. Now all police officers and US soldiers must find a way to handle the consequences of invading Oder and send lots of them to save the world. Critics say that this may lead to a massive amount of deaths caused by the phantom gem effects.

Luckily, there are still many police officers and soldiers throughout the world who want to see where items have been stolen for the wedding and how to rescue them back. For example, there are some police officers and a few soldiers in Robloxia patrolling the city, finding where items have been stolen and that the items have to be taken back. Some of the items such as food and other consumable items cannot be recovered and have been consumed during the wedding and after that, so everyone has to produce extra supplies to recover many businesses from the robberies before. Other items that cannot be consumed are still stolen, so the owners of these items must find a way to recover back without many deaths and considering potential attacks.

In the town of Robloxia, local police officers check for local areas such as the main store, only to find out that nearly all of the items have been stolen. Luckily, many residents who were at the wedding came back without a chance to save the world. After the wedding, residents who

attended were escorted back home without any belongings, causing them to feel grounded. The residents really wish that everything recovers, but many stolen items are either consumed or kept by Bloxman and epicrsxxx099811. Officers also check out other places such as school, the clinic, the news station, and many other places to know. Some of the items in more common areas such as the airport and parts of Robloxity, the main city of the metro Robloxia is in, are experiencing national guard and soldiers finding stolen items Bloxman's group has taken.

In the middle of the day, the focus shifts to parts of Robloxity and the neighborhood of Robloxia. Unlike the town of Robloxia, the neighborhood of Robloxia is newly built and has new content. This indicates by many officers who are in Robloxia that the town of Robloxia used to be a town not too far from Robloxity before the suburbs. When the suburbs came, Robloxia expanded its borders to include another section of the town as the neighborhood of Robloxia, being surrounded by hills and small mountains in all directions.

After explaining the history of differences between Robloxia and Robloxity, the officers search and explore stolen pieces and items to determine where to exactly place the recovered item the United States wishes to get back from Oder. This takes place now in parts of Robloxity and the whole neighborhood of Robloxia. This also includes the theme parks with themes being stolen as well. Officers explore various other places for any stolen items but mainly rely on the history the residents explain to determine and easily spot places with empty shelves.

Officers and SWAT team continue to search, with some groceries and goods being much more empty. Places in and around Robloxity also have been looted as well. The security guards throughout the country are now starting to prepare for any potential chaos and looting Bloxman has planned to do but may not be enough to stop all of that. The shift is then over for the day.

THE NEXT MORNING, the guards are now preparing to explore the second part of Robloxia and Robloxity. They plan to first concentrate in the city of Robloxity first thing in the morning to look for stolen pieces and looted places. After that, they plan on going to even more theme parks to explore more stolen pieces over there. The final plan involves going to areas around the state prison to examine looted businesses since these areas have the highest crime rates in the city.

The guards first go with their plan to examine Robloxity. They first look at the places in the south first. There are two downtown areas close together. One is in the south where it has one of the tallest buildings in the city. The officers look for and see many looted spots. There are also local residents practicing hiding in the event of a Bloxman invasion.

The shift goes to the northern parts of Robloxity where the guards go downtown once again this time in the north. That one is the first print of the original town and city before a new center of the city is built just to the southeast. The officers go to various places, even exploring places outside of the area such as beach houses and the beach. Many parts of Robloxity have been looted while some other places are barely looted. Now the officers shift to the small and a more suburban or rural town of Robloxity that contains a Blox-Mart that have been partially looted by the Bloxman robbers who robs many important places for the wedding and for supplies to keep the state going and possibly expand into an empire the guards are afraid of that.

After examining Robloxity, some officers go to various theme parks. They find out that the most important theme parks in Robloxia, such as Roblox Point and Watersurfian, have been stolen. This causes Watersurfian theme parks to go bankrupt due to low popularity.

However, the main part of the afternoon involves the officers going to places around the state prison to find out some have been stolen. Nearby criminals have been stealing many goods

from places around the state prison for years, causing the place to be nicknamed Jailbreak. The real place around the state prison is known as Salem though. While the officers are searching for stolen items and looted businesses, Bloxman has already planned to use the state prison as the prison for future prisoners for the Oder Empire, mainly those who refuse to let the empire come from coast to coast. Finally, the officers conclude that all businesses have been robbed, even the passing train that delivers supplies to several cities and towns near the state prison.

Now the focus is mainly in the theme parks and the rest of Robloxia. Minor theme parks are not as damaged as the important theme parks though. The smaller the park, the safer. Even though there are big suburbs throughout Robloxia, places that are well known tend to be looted more than the ones least known by Midnightlion53 and the Oder gang.

AFTER EXPLORING ROBLOXIA's stolen pieces, the shift for concentration of investigation is going south to the Mid-Atlantic and southern region where the Ultimate Driving program takes place. The plan for the next three days are divided into regions. The first day involves patrolling the three or more Delaware and possibly Maryland places. The second day involves examining stolen pieces in and around North Carolina, and the third day is in Quebec, Canada.

Local police officers tend to stay in their places, but the soldiers call the other police departments to search for some local areas. On the first day, the soldiers travel from Robloxia to the Mid-Atlantic region. This includes Liberty City. The only important place that has been robbed is when something takes electricity away from the Rotterdam Tower.

The guards quickly climb up the tower and restore some electricity in some areas as well as the other areas too. This is one of the things that has been recovered. The city is so big that the

Bloxman gang is not that interested in robbing nearly all of the businesses as the wedding came closer back then. Now there is not much to save in Liberty City. After a checkup of Liberty City and letting the LCPD explore more stolen pieces, the main focus is now on Delaware, in which Westover Islands is the first place to be examined by the soldiers and local police.

The examination starts at Kensington. The port there has been stolen as many cargo ready to either import or export has been stolen. North of the port is the main town. Many businesses have been stolen, especially the hospital, the dealership, and the gas station as well as the DOT building. After a look at Kensington, the focus is now on Woodbury. The small hamlet is mostly known for farms, and many crops are also stolen as well by the Oder gang.

A new industrial area to the southeast has also been stolen as the guards see. Next is the main town of Westover. Because Westover is the main town of Westover Islands, most places have been stolen and looted. More than half of Palm Shores have also been stolen.

Last but not least to examine is South Beach. South Beach is a beach town located on its own island. The town is mostly in the southern portion of the island. Because of the small size, less than half of the town has been robbed. The island is just mostly a beach with DE-12 road in the middle of the island. However, the guards are not done with Delaware yet.

The soldiers come to Odessa and call in the Odessa Police Department to search for any stolen places in not just the town of Odessa but the surrounding areas as well. The first place to examine is Bordenville. Because it looks like a big suburb, many places in the town have been robbed. Odessa and countless other places have also been robbed as well.

The shift is over for the guards. They plan on exploring the rest of Delaware as well as parts of North Carolina tomorrow. Last, all guards go to rest throughout Odessa.

THE SHIFT starts once again with the guards focusing on the next area which is Newark. The soldiers then plan on spending the whole morning exploring stolen pieces for the rest of the state of Delaware. This includes regions like Newark, Delancy Gorge, and a few other places. Then, the guards are going to go to North Carolina to look at two or three different regions such as Currituck, Monroe, and possibly Fontana Dam as well as some other regions along the way.

After the plan is made, the guards also have to consider other parts of the world. Beyond the United States, the Bloxman gang has already stolen many other items across the world. That means one of the guards must alert the world to explore stolen pieces as well. This is not the best event as Midnightlion53 would have become the leader of all of the guards since he was so good at being defensive. Now Midnightlion53 is still stuck in prison separated with his kids in other cells of prison up in the moon. Midnightlion53's inventory has been taken away by the gang, meaning he cannot call for help anymore, meaning another worst event happening now.

One of the guards calls off several soldiers from different countries to team up and try to save the world altogether. First, they must explore stolen pieces from west to east. The affected places are mostly developed countries as the developing countries have no interest in the gang just yet. So the journey is going to begin in western Europe and end in Asia.

Since several guards call off many of the soldiers, and the soldiers call off local police departments from across the world, they are having a lot of work searching up for stolen pieces that can be examined. Once the stolen pieces are discovered, the guards are supposed to locate where they came from and plan to get these items back into their place while working hard.

After calling into the world, the guards are now watching across the world and often talk online with the other soldiers across the world. This takes only a quarter of the morning.

After alerting others to examine and explore stolen locations, not only do officers and soldiers have to see and find locations where the gang stole the goods but also random residents as well. All unemployed people can join in and try to find damaged and stolen businesses, so that they can find a way to restore the business back soon once the world is saved. There are also challenges to face when trying to save the world, making the world have a goal to save.

Everyone tries to find pieces that are stolen by going to its original location. The first is to check the rural areas of Newark, but there are not any stolen pieces there. The city is where the gang stole many items there for the wedding and also for the potential expansion of the Oder to become an empire. After checking on Newark, everyone learns that more than half of the city has been affected by the gang. They move onto the next region just north of the Indian River.

The Delancy Gorge region is next, just north of the river. The first town to look at is North Newark, with some of the plaza missing items. After North Newark is Gerard Ferry. Some businesses there and the hospital have stolen goods that need to be taken back. Everyone goes on either I-80 or US-322 to go to Delancy Gorge, the main town of the region. Similar to Westover, Odessa, and Newark, the majority of its town businesses are missing supplies because they are stolen by the Oder gang. Pomeroy and Pomeroy mountain is the second last place to check the areas along DE-41 to go back to Gerard Ferry. From there, everyone leaves the region.

Everyone who wants to search for locations where their items are stolen can do so. Many Americans that want to explore more locations to search for stolen locations are now going out of the state. They are going to the next important destinations such as Currituck and Monroe in North Carolina. However, there are different ways to get from Delancy Gorge to Currituck. One is to simply drive. An army of trucks bringing cargo and some passengers drives along I-95, US

Highway 1, US-13, south or a combination of those depending on the driver's choice. Others go north along the highway past Harriston to get to the airport. From there, they fly a plane that goes directly to the Currituck Airport just north of Currituck, east of Halifax, west of US-13 and the Atlantic Ocean, and south of the Virginia border. The plane arrives first and searches for any of the stolen locations followed by an army of trucks and cars a few hours later.

The first destination to look at is Currituck, the main town of the Currituck region. Since it is the main town of the region, everyone searches the town and learns that there are many locations where supplies are missing due to Oder gangs stealing them while on the way to the forced wedding. The next place is just south at Swanquarter, another big town that may be a part of Currituck. Then, everyone searches in Fort Landing and Halifax, with at least one or more places with stolen content. Last, they stop searching and settle in their shelters for the night.

ON THE THIRD DAY of exploring stolen pieces in the Ultimate Driving program, everyone prepares to explore the rest of North Carolina and the surrounding states as well as up in Canada in the afternoon. The plan is to explore Monroe the whole morning first. If there is time left in the morning, everyone can explore the whole Fontana Dam region which spans North Carolina and Tennessee. The whole afternoon is spent commuting to and exploring Quebec.

First, the main group of soldiers who often travels and focuses on the main parts of places continues with their journey. However, more local police and residents tend to explore more local areas to see where the gang has robbed. The military is not alone in the national search. Other squads of search include widespread SWAT teams, the state patrol, and the FIB. Generally, the main soldiers not just explore Ultimate Driving locations but every place in America.

The main focus in the morning is Monroe. Monroe is a large town that is also a suburb of a larger city, being part of a metropolitan area. However, Monroe can also be a county because it is not just the main town but also its suburbs such as Council Oaks and its rural towns to the southwest, with signs even reading several towns, including the main city.

The main soldiers enter Monroe from the northern suburbs and head to the police first. The police are located at the station in the town of Monroe. They already know the information to search for stolen items in every business. The main soldiers just focus on locations on a national scale while local places are searched by local squads. As a community, everyone learns that some of the places have been stolen, especially the center of the town.

Some residents also have lunches in several restaurants, looking for stolen supplies. They tend to finish the whole restaurant due to low supply because of the previous robbery.

After lunch hours, everyone focuses on the stores and finds out that more than half of the town's businesses have been stolen for both the forced wedding and to take home in the Oder state. They also focus on rural towns to find out that they are not as affected as in the town.

After exploring Monroe, the focus goes onto Canada. The main soldiers skip Fontana Dam region and let local citizens explore stolen pieces there despite a small population there. From there, the troops find transportation. Since the day is ending soon, they hop on a special plane and fly to Quebec, at the airport just west of highway 15 and Ste Martine.

With low traffic density, both the troops and a small number of local residents explore the region of Noyan. Despite the order, the main focus goes to Ste Martine because that is the big town to the northeast. The next is Noyan, where both towns have been robbed somehow. Last is Ormstown, which is also robbed too. Finally, everyone settles down and sleeps for the night.

AFTER EXPLORING THE Ultimate Driving program locations, everyone wakes up the next morning and gets ready to search for more stolen locations. The troops then plan on spending the next two days at Sunshine City. They know that many parts of Sunshine City are not as affected as the other cities. The only affected places within Sunshine City are the important theme parks. The troops also plan a flight in the morning and how to get to the airport.

The troops call a plane to arrive at the airport. They drive to the airport in the northwest corner of the Noyan region, just north of Ormstown. Once the plane arrives, the troops board and fly to Sunshine City. At first, there are no affected areas when exiting the airport and going on the way to the theme parks. However when the troops go downtown, the downtown area has only a small amount of businesses robbed. That is just a small percentage of the city being robbed.

The vast majority of the robberies in Sunshine City caused by Bloxman and his gang are the theme parks. The troops and local squads go to the first park at Universal Studios Roblox. They enter the CityWalk and learn that most of the businesses and themes there have been robbed by the Oder gang. Next is the main theme park in the Production Central, where more places are robbed. The group searches for more robbed locations.

The next region to explore for any stolen locations is the Wizarding World of Roblox. The rides are a bit affected as many of the structures have been stolen by the gang. After seeing the region, the group goes to the Jurrassic section of the park. Dinosaur figures and some other themes have been stolen by the gang, causing some members to recommend taking these figures back if they can. If not, they may have to produce an extra one at an expensive cost.

After the Jurassic section is the Science Fiction world, a theme of technology and futures. Some members of the squad group feel like they are in the future as a result, but some themes

there are missing. The Oder gang may have taken advantage of these themes and made them real, so they feel like the gang is the admin of the whole world. Next is the other half of Production Central, which has the Liberty City mini-section of the park. There is one ride and an access to the backstage, all of which are both stolen and broken into by the Oder gang.

Next place to examine is the backstage of the park which includes the studio section. However, many figures in the studio that used to make movies are now stolen by the Oder gang. Some office materials are also stolen as well. The backstage plays a big role as the staffing area of the park. After exploring the backstage section, everyone goes to the front of the park and into Cabana Bay, which is the area to settle down and relax during a visit to the park.

Everyone checks in and settles down. The national soldiers go to the premium rooms while everyone else goes to the standard rooms in either Americana or Continental and sleeps.

ON THE SECOND DAY in Sunshine City, everyone wakes up and plans to go to another most important theme park. They call it the Fun World because of all of the fun content in there as part of a big company. They plan on exploring several parts of the theme park as well as other parts of Sunshine City to examine the small percentage of all places being robbed. Other than Fun World, everyone should be able to search up the whole city, especially other theme parks.

Everyone packs up and checks off from the Cabana Bay. They find their way out and go to the front of Fun World. They must have tickets to enter, but the army and the police are free to enter. Other citizens take their risk and enter the park to both have fun and to search.

The main purpose of going to theme parks today is to search for themes that have been stolen. This park is where the themes have been stolen mainly for the forced wedding's theme on

the moon. The first places to explore are the rides and attractions to the front. This is defined by areas between the front of the park and the castle. The group splits up and explores various rides and attractions in the front area. Only about half of the theme has been robbed.

The next destination is where the groups reunite at the castle. Inside is mostly robbed by the Oder gang, especially the celebration goods for the forced wedding. Some of the goods have been consumed, making the cost to recover even more expensive than before.

After exploring the castle, everyone explores the rest of the park. Some even venture deep into the park and find out that there are death traps installed in hidden parts. Almost nobody explores the place because not only is it dangerous to enter but also looks like a staff door to get in. The Oder gang seems to manage to get in and add some dangerous traps to the moon in order to keep enemies away from their borders. As a splitted group, the rest of Fun World has been explored for robbed locations, and everyone leaves the park in the early afternoon.

However, there is more to the city than just the theme parks. Everyone explores the rest of the city splitted up in groups, only to find out that not all of the places have been robbed. Next is several more theme parks and attractions other than the two biggest ones already explored. The bigger the park, the more content and theme there have been robbed by the Oder gang.

However, there are even more places other than the Sunshine City theme parks that have been robbed such as the space center and the port. Everyone goes to the port first as the cargo there has been stolen by the Oder gang while trying to steal goods throughout the world.

‘ Finally, the nearby space center is hit hard by the Oder gang because one of the rockets there has been stolen by the Oder gang. This is the basic transportation from earth to the forced wedding on the moon. After exploring stolen pieces at Sunshine City, everyone goes to sleep.

EVERYONE WAKES UP the next day and gets ready to explore a different place in order to find locations where the gang has stolen some items. They plan to spend the next three days at the state of San Andreas. The first place to explore is Pacifico and its surroundings. The next is Bloxywood, which can be on a second day. A region tends to take a day to explore even with teamwork included. The third day can be the rest of San Andreas to be explored.

Everyone gets ready to go to San Andreas. From Sunshine City, they have to go from coast to coast, meaning everyone has to be on a plane. Only the national searchers are allowed to travel in which is being focused on now. Local residents and searchers are to stay in place.

The searchers go to the airport and find a flight. There is an airport near Pacifico which is only about an hour or so away but close to Full Moon Bay. The searchers get a flight to Pacifico and spend several hours on the flight. However, the plane arrives only a few minutes away from the time of morning relative to the searchers but hours from Sunshine City's time. The searchers exit the airport and find a spawner to spawn any vehicle of any size. The nearest town to the airport is Full Moon Bay. The searchers go to Full Moon Bay. All they can find there is the grocery store and several gas stations, in which the grocery store has empty shelves still from the time that the Oder gang must have stolen some food for their business.

After exploring Full Moon Bay, the searchers go to Pacifico, which is the main town of the Pacifico region. This includes the police station which is the first place the searchers go to. They alert the police to not only get busy on the streets but also have extra officers join to search for any locations where the items are supposed to go but stolen already.

Some of the officers and searchers either have lunch at the police station or several places and restaurants across the town such as the cafe, a place to hang out with fellow searchers.

After lunch, the searchers explore the rest of the Pacifico region. They first explore the Goggle headquarters and search for every office room there is. At least one or more rooms have locations where it used to have items in the location but stolen. This is important because data is needed, so when items are either newly produced or recovered from Oder's control, these ones can go back to where they were. This is why searchers need to explore everywhere with help.

The Pacifico Police Department takes charge of the rest of the town to search for places where the Oder gang used to go to. Since there are so many robbers of the gang with the help of local criminals, it is hard for cameras to detect which places are not that affected in town. The national searchers then spend the rest of the day in the rural top of Pacifico and the speedway.

Eventually, the national searchers either settle down in the Pacifico hotel, travel to the next place, Bloxywood, early, or settle while on the way to Bloxywood, and sleep for the night.

EVERYONE WAKES UP nearly at the same time and gets ready to search for stolen locations at Bloxywood. Since Bloxywood has already changed just last year and even expanded its region to include a small city as well as changing the structure or possibly the orientation, it is hard to tell from the previous data. Now it is time to help search for locations where stolen items come from and where to put these items back in place once everything recovers eventually.

Everyone gets ready to meet as a group at Bloxywood. Some are already at the Pacifico Hotel, getting ready to travel. Some barely arrive at the place either driving or sailing. Others are already settled down at a hotel in Bloxywood. They all meet at the airport first.

Once at the airport, everyone has to be careful and not meet on the runway. Other than the planes using the runway, there are drag racers active, often going from the southern part of

the airport to the northern part. The hangar is the best option to meet. During the meeting, the national searchers plan on generally searching for the day. The first task is to get to the police station. That way, the searchers can have access to the local police data and call in local police officers to not just patrol the city but also to search for places where the Oder gang stole some items. As a result, the searchers also watch cameras from previous times, even showing both criminals and the Oder gang working together to steal many items for their business. It is hard to determine which place is not hit by the gang as nearly all of the buildings detected by camera have seen some criminals and gangs steal items from every single building to take home.

At the donut shop, some searchers and many police officers take their lunch break and eat lunch there. Others go to various restaurants to do the same too. Other than just food, searchers find out that the supply chain is cut by half as a result of several gangs stealing items.

After lunch and a little bit of work, it is time to explore the downtown area of the city. Local police officers search in the buildings while the national searchers stay outside. They even go to the minor subway system and see some spilled trash. Spilled trash indicates where the gang must have gone as the security cameras capture videos of the gangs running and knocking down the trash cans in the process. For the rest of downtown, the tallest buildings such as the Amaze Bank Tower have some content that have been stolen by the Oder gang and their friends.

Other than downtown, the national searchers go to search for the rest of Bloxywood such as the port and the beach where its content has also been stolen. Even the school has some content being stolen too. Rural parts of the region include the hills and the desert locations.

After going over most of the region, the search team plans on exploring the rest of the region tomorrow and exploring other parts of San Andreas. Last, they go to bed and sleep.

AFTER EXPLORING most of Bloxywood, the team plans big time while in bed. They plan to search and explore for stolen content in the other new downtown area with its name unknown other than the downtown being part of Bloxywood. It is also known as Bloxywood's second downtown. The Oder gang may have stolen some content there. Other than that, there are still many places to explore such as the west coast rather than the little east coast for the lake.

The team gathers up and uses their plan. They first enter the second downtown where its items are not as affected as the first and main one. This is because either the place is newly built or it is not included in the important map when the Oder gang first encounters the map. The search continues in the city where some members and local police officers meet up to watch the security camera recordings, showing that not all buildings there have been broken into. More than just half of the buildings shown in the area have content that has been stolen though. That means the area is safe. It also means that whenever items are newly produced or recovered from the gang, they are to be taken back to the same location where it was before.

Then, the searchers explore the rest of the whole region. They did not get a chance to explore the mountain, nor did the local police officers. As a result, they all meet up on the small mountain where they take a view of all of the buildings and determine which buildings have its content being stolen. The majority of the place has seen at least one thief visit.

For lunch, the national searchers eat with the local police officers at various places for the last time before leaving off to the other parts of San Andreas. They also plan there too.

After lunch, the national searchers get ready for a road trip to the other parts of the state. Since two days ago, the national searchers are already with the state patrol, meaning they have been together for the past two days. Now they are planning to explore the major cities and the

most important rural places of the state since the most important locations are targets for gangs to steal the content in order to decorate or expand their place for the Oder business.

The first other city is just north of Bloxywood called Los Santos. Since the city is big, the searchers tend to explore the most important places in the city. Others are taken care of by the LSPD. As a team, the searchers and the LSPD explore the whole city and find some records about stolen content and other crimes. The most famous ones have taken place in 1992 and 2013, where these years are the ones the Oder gang has taken advantage of in order to establish a very strong gang. It is not just Los Santos that is to be explored but also San Fierro and possibly Las Venturas where the national searchers circulate these three cities with similar results.

However, San Fierro and Las Venturas, along with surrounding counties have only seen famous crime years of 1992. After learning all about that, the searches settle down and sleep.

OTHER THAN THE PLACES EXPLORED, the searchers plan on exploring the rest of the US and possibly some other countries surrounding that for the last two days. There is not much time left in the schedule, so the national searchers only plan to explore and search on the next to next important locations in America. The rest of the country of the least important places are to be taken care of by the local searchers, where some constantly search all the time as of now.

The search crew begins to get out of San Andreas and either go north or east, meaning that one big group of searchers splits up into several smaller groups. This is because they want to make sure that they are finding the location where the gang must have gone to.

First off, the crew considers everything as they are only allowed to explore places on a federal level. Any state and local properties are to be searched by their respective searchers. For

example, all state searchers are only allowed to search anywhere on a state level within the state while the local searchers are allowed to search at any business within a community. With all that being said, the system continues for the rest of the two days. For the rest of the morning, the splitted searchers explore federal property and search for locations where the stolen items are supposed to go when they somehow return. There are more of them that need recovery.

In the middle of the day, many crews deserve their break. They relax at any building they are left off with, with some of them even outdoors having fun there.

After break, the crew continues on their search. They communicate with state and local search crews, including enforcement agencies such as the police. Just like before, they all search for all places where stolen items used to be before they are taken. Like before, all of the Oder gang and their fellow gangs help with stealing a lot of items and supplies in order to meet all of the needs back in the land of Oder. These items may need to come back or just stay.

In the afternoon, the crews searched from west to east. Although the crews are equally searching for rural and slightly urban parts of the mountain areas, some of the crews make their way to the middle. There is one famous crew who goes to the middle near a border.

That crew goes to the El Paso border and checks on the border patrol. The border patrol is doing a good job, but some of the officers need to search for locations with stolen items. The cameras over there show that since the gangs are everywhere, some of them are on the border and steal many supplies for the Oder state border. In addition to the search, many immigrants show up. Some of them are nice and can get through the border. Others have guns and often kill some officers, causing a border fight. Some immigrants kill a wave of officers and help the Oder gang steal more items. After some fights, everyone finds a place to settle and goes to sleep.

EVERYONE WAKES UP the next day and gets ready for the last day of searching for locations where the items were first stolen. The last focus was on the El Paso border. Now the next focus for the crew plans and pretty much everywhere. However, one of the main focuses is on at least two places. One is in Greenville, Wisconsin where the crew from El Paso are supposed to go followed by an afternoon search in Southwest Florida and the rest of the surroundings.

Although there are many crews searching everywhere, they are not allowed to search many places to the east. This is because many important places in the east have been explored such as states with the Ultimate Driving program, Sunshine City, and Robloxia as well as some other major cities. The next most important place to explore is Greenville. Greenville is not too far from the Oder state as it is two or three states north of the Oder land border.

The crew heads to the nearest airport from the border. They wait for a special plane to come just like always when traveling from one side of the border to another. Once they get on the plane, they cannot wait to search. This only takes a portion of the morning to get to. There is a Greenville Airport the crew is going to arrive. Once the crew arrives, they are greeted by the state patrol, who takes them to where they are to search for and which place to search.

The first destinations to search for along with the state patrol are the interactive places. Even though a mall is close to the airport, only local officers are allowed in as many places are not interactive other than the parking lot. The next retail location to visit is the one with several businesses and Just Buy. The crew visits Just Buy and other surrounding businesses. They all look good, but some content there is missing due to the gangs often stealing items over there.

In the retail outlet, there are at least two restaurants. The crew spends their time eating lunch there. Other members and groups go to the fast food and gas station combination.

After lunch, the search continues. The plan is taking much longer. The crew continues to search for surrounding areas. They land on the classic pizza and arcade location where many of the content has been stolen. This indicates that epicrsxxx099811 has been there since he was the one who came up with a story idea with this kind of place. Eventually, the Oder gang plans to expand the story, along with Midnightlion53's original stories despite these two members being big rivals. Anyways, the crew continues on all the way to the dealership area nearby.

At the dealership, nearly half of the vehicles have been stolen, making the price of them somewhat expensive. Just nearby the dealership area is the driving registration building. After exploring places behind the dealership area, the crew finishes off exploring Greenville by going to the more classic areas and old areas of the town. They find out that many places that are more interactive have at least one content being stolen and needs to be recovered soon.

After exploring Greenville, the crew makes their way to Southwest Florida and first goes to the beach first. They get a car there and split off for the rest of the day. At one point, the crew spots many sports cars speeding through the major roads. Finally, they all go to interactive places and even see some gangs stealing supplies before they are seen shooting against the police.

After exploring the region, all of the crews are done exploring the United States, with some other crews doing the same for the rest of the world. Last, they all go to bed and sleep.

**R**escue attempt is the next task for the crew. Now that the crew is done looking for places where its items are stolen and where to place them back once the items are either recovered or produced, now they have to rescue them and the most important veteran heroes such as Midnightlion53. Midnightlion53 is still currently jailed by the Oder gang at the moon, so the crew must find their way inside. Not to forget that the wife is still kidnapped in the center of the Oder state in Metropolis, secured by the gang members.

Now whatever the crew is in since the last search day, they have to find their way to the nearest airport, so they can get a flight to the nearest airport or military base to the Oder border. Going through the Oder border is hard and challenging. Anyways, the first task is to get near the border. Many crews are having their flights to areas near the border. At any place near the border where the crews are at, they simply drive over there instead. All of the crews must meet along with local members within the area at first. The plan is to just arrive at areas near the border.

Now there are limitations. The crew has just set a week to try to defeat the gang. They first must go to areas near the border first. There also must be a large gathering/

However, these plans do not have to go this way. Some argue a sudden deployment of soldiers and officers are not going to work. They must do it gradually. They are going to aend a

small number of officers and soldiers to help the constant police officers trying to defeat and take back the Oder state but fail. If the first plan fails, the next plan goes. The next plan is the same plan but with slightly more soldiers. The more soldiers there are, the more likely the Oder state is going to be defeated and returned back to its original state. If the second plan fails, the third plan goes on. The third plan has the most soldiers and involves large gatherings all invading the Oder state. Not to mention bombs dropping to important parts of the Oder state might work.

The crews take a break and think about what is to happen next. While taking a break, the plan for the rest of the day is to plan for the second half of the rescue attempt.

Whenever the first rescue attempt at Metropolis is either passed or failed, the second half of the rescue attempt is on. Each rescue attempt is three days, bringing the total number of days of rescue attempt to six. Including the planning day which is today, rescue attempt time now adds up to a week. With a week of attempt, the crew now plans for the next attempt.

The second rescue attempt involves going to the moon and saving Midnightlion53, his kids, and all of the stolen items. If the second rescue attempt passes in some form, some items that were stolen by the gang can return to its place. To find the exact place, the crew must use their data from the last two weeks in order to recover the world. In order to get to the moon, the crew can either use the traditional rocket to get there which holds up to two members or to use the phantom gem teleportation which may cause some crew members to get sick by that. There are at least two locations to access the moon. One is in Roboxia, and the other is in Sunshine City. The other location is known to test rockets and sometimes called the place Rocket Tester.

After planning to rescue in order to first save the world, the crew at any location finds a shelter and a place to settle in. Last, they all go to bed and sleep at the beginning of the night.

THE PLAN GOES ON with the whole crew waking up nearly at the same time. Some members are in either Greenville or Pleasant Valley, the two most important places considered to them near the Oder state border. Now only a small number of soldiers are allowed to combat at the border and attempt to invade the state. Based on the history of the state, the crew must consider the risks and take safety measures in order to not experience the costs of the Oder invasion.

The whole crew from various places arrive at places near the Oder borders. At first, only the local crews near the borders were to get deployed for this day. They plan to all invade the Oder borders and into the land. With that in mind, the wave closest to the border begins to invade the land. This includes the constant police officers and some soldiers supporting them entering the Oder border and invading. So far, nothing has gone wrong yet.

The goal is to get to the border. They plan to gradually invade the border by taking back the land from them. There are a small number of enemies that can easily be taken out. The first wave manages to kill the outer layer of a group of enemies patrolling the border. The first wave is not really a wave as there has been a planned three-wave system with today being only the troops near the border and invading it. The outside world cannot believe the progress being done so far yet. No signs of the phantom gem or anything wrong just yet. The first wave of the first day of troops continues to invade deeper into the state and heading towards Metropolis.

Lots of people watch the progress of the troops. They take a break. Some Oder soldiers let the invaders become “friends” by having lunch with them and being close together.

However, it’s a trap. Now the invaders are experiencing an infection with no symptoms. They are expecting that the Oder troops are going to fight, but they refuse to fight and fight in a nice way. The Oder troops even allow the invaders to get close to Metropolis and tell them to

take back the capital in order to save the world. Once the invaders enter Metropolis, they are so surprised that the leaders of the gang are nice. They only see Dr. Bloxman and epicrsxxx099811. Once some invaders attempt to kill epicrsxxx0998911, they think epicrsxxx099811 has been killed. They are really wrong as that figure that is killed is actually a fake epicrsxxx099811.

As the invaders spend time in Metropolis surrounded by the nice enemy soldiers, they begin showing symptoms very quick and spread faster. With the phantom gem variant of all of the diseases the enemies have given, the invaders become really sick. They feel weak all of the sudden and even reminds them of death. The Oder troops refuse to take the invaders and rush them to the hospital, resulting in either the invaders killed or taken to prison for slow death.

The news becomes shocked that the first wave of soldiers thinks they are able to defeat the gang, but they are mistaken as the gang becomes so smart and so powerful.

THE NEXT MORNING, the governments across the United States and a little bit of Canada plan to send troops throughout the country and invade the Bloxman property. They are aware that it is not easy to invade as invading the land can cause troops to get sick and spread, threatening that the phantom gem variant might cause a pandemic that forces everyone to listen to the dictators when they take over. As a result, the plan is to just invade and spread out with masks.

The amount of time it takes to gather all of the national soldiers and some local officers together near the border takes about half of the morning. Lots of flights, both passenger and military, all go to various airports surrounding the Oder border to start the invasion.

Some of the troops arrive at the airports early while some others are behind. Local troops are not deployed yet unless needed. The troops have to practice wearing masks and spread out to

become distanced in order to not contract the phantom gem variant of any disease. Maybe that method could increase the chance that the troops can win and save the world overall. The actual goal of the invasion is to take the kidnapped wife out of Bloxman control and back home. The troops charge up and get ready to invade but not yet. More troops across the country are coming while the troops demand to begin the invasion just before the middle of the day.

Some troops take a break in the middle of the day while taking back and saving the world while some others are taking a break everywhere and on their way to the invasion. The border is actually getting smaller and smaller during the invasion but somehow expands back to its old size at the last minute. The troops are all ready to begin the invasion one by one.

The new invaders and a bigger version are more aware of the disease and are not getting protected by wearing masks and still risking having the disease. There is a small chance that the disease can go through the mask and make some invaders sick. With masks, transmission of the variant is limited, allowing more invasion of the land to take place by the invaders.

The Oder soldiers are more aware of the invaders taking steps to not get the disease, so they decide the normal way of fighting. They directly fight the invaders, but there are a lot of them taking place. The majority of the soldiers near the borders have weak defenses. The troops then manage to kill off many of the border soldiers. The closer the invaders are to Metropolis, the stronger the enemy troops must face. Right now, the troops are still fighting their way and making progress. They continue to make progress with a lot of friends behind them.

When the first enemy troops arrive at Metropolis, the disease transmission gets stronger, and a significant amount of troops still gets sick. The troops surrounding Metropolis are also strong enough to kick all of the national troops and teleport them out of the border.

THE THIRD AND LAST DAY of the Oder invasion by the enemy troops are planned. Instead of focusing on the national level, there has to be a global level. Everyone across the globe with different cultures must find a way to take back a state from the Oder gang and save the world. The national troops and even local police officers from across the world are not strong enough to fight the gang. Now the world is depending on whoever wins this set of battles.

Now the goal of the final day is to finally take over and win the battle in one day. The global troops are called off, and many of them are coming to help the American troops to invade the Oder territory and save the world overall. They believe they are even able to save the wife and take her out of Bloxman control before saving Midnightlion53 at the moon for the next three planned days. They also believe Midnightlion53 and his family are to finally reunite after a bad time of kidnappings and an attempt to save the world but failed. The world leaders are now in charge and have luckily not to become kidnapped and taken over by the Oder gang.

Some global troops meet the American troops and all together, go to the Oder border to invade the territory. This starts yet another part of the battle that is going on. The Oder troops respond by defense with its goals to keep the invaders out. There are too many troops for the border troops to handle, so the first layer of the Oder territory has been taken back, at least three times. Although at least one troop invades Metropolis two in a row, they never manage to take that city or any of the surrounding areas back as these contain strong gang members.

The troops take their break from battle and eat lunch. However, some troops are going to be sick as some do not wear masks or spread out. They also have to be careful too.

After break, the troops continue the invasion with lots of other troops across the world falling behind too. More land of the Oder territory has been taken back with progress going on.

The general of the third wave even makes himself to Metropolis. Some even invade the house and the prison in Metropolis. The wife sees the good troops and thanks them for saving. This is one of the goals met so far, and the goal is expected to become met all the time. The wife is then escorted out of the border while the troops fight their way. Since the general is still in the strong and central portion of the territory, he becomes very sick, and the disease spreads quickly to the surrounding troops, weakening the invaders by a lot, causing a turning point to happen.

The real epicrsxxx099811 quickly swipes the wife back to the new husband of Bloxman while the Oder troops surrounding Metropolis manages to use phantom gem powers to wipe out large amounts of global soldiers, causing a huge failure for the rest of the world.

As the Oder gang troops begin to kick the enemies out of the border, they start recovery in order to expand the Oder territory back to where it was before the first wave happened.

FOR THE NEXT THREE DAYS, the shift goes to Roboxia where the new goal is to now save Midnightlion53 and make a jailbreak. All the soldiers and Robloxian officers plan on finding a way to the moon and saving Midnightlion53. They believe going to the moon is much easier than going to Metropolis due to less Oder members and disease at the moon. Midnightlion53 may be needed before any other task comes such as all invading Metropolis eventually.

The troops make their way to Roboxia and head to Robloxity. From there, they gather some information and inform all police departments around Robloxity. Some of them respond and attempt to save Midnightlion53. However, they must find a way up to the moon.

The first day only involves the local officers actually going to the moon themselves. They first go to the station first somewhere in Roboxia. Some officers teleport directly to the moon

while the rest make a long process. With some officers teleporting to the moon, they do not have the ability to survive on the moon and easily get sick of both the phantom gem variant and the lack of oxygen. Therefore, the easiest way to get to the moon is by rocket.

However, a rocket in Roblozia can only hold up to two passengers. This is a warning from the station staff. If more than two passengers ride the rocket, the rocket could either miss the space station as the target or possibly crash into earth, most likely going to kill everyone on board. Three passengers can ride the monorail from the lobby to the station.

The station lacks the staff, so the officers decide to take over. There are two ways to launch the rocket. One is to have someone launch the rocket, and the other is to launch the rocket and have enough time for the monorail and the boarding of the rocket.

Several rockets take off on the same day. Many officers are at the space station in space waiting for another ship to depart to the moon. Unlike the rocket, the ship can hold more officers. More officers can arrive directly at the moon and become prepared for it.

On the moon, several officers arrive and get to prison. Since the moon is mostly empty, it is easy to get the officers to wander without anything as long as the safety gear is on. However, the area where the prison is holding Midnightlion53 is secured. That means either an Oder gang member is supervising the prison and watching the invaders, or the gang members are called off to stop the invaders from saving Midnightlion53. Both ways happened, and Midnightlion53 did not get saved. All of the officers are escorted either back to earth or are trapped underground to a big battlefield where the Oder gang members win the whole time.

At the end of the day, the officers need the troops planned for tomorrow in order to save Midnightlion53 more as an attempt. For now, they settle down in a shelter and rest.

ON THE SECOND DAY of the moon rescue attempt, everyone wakes up and plans for a second wave of the battle to save Midnightlion53. The next wave is not just local police officers but also the US soldiers coming to the moon to help the officers and become more likely to save. The method of going to the moon is the same except more troops are needed. The troops plan their flight and drive from everywhere and make plans to arrive at the Robloxia space center.

The troops closest to Robloxia take a driver to the Robloxia space center while the others are taking a flight to the space center. There are several space centers throughout the country, so not everyone needs to go to the Robloxia space center. Some are because Robloxia is the closest launch area to the side of the moon where Midnightlion53 is in prison at.

The plan is to all at the same time get everyone to the moon. There are limitations when the ship to the moon can only hold a certain amount of passengers. The Oder troops are already prepared for the next invasion and are capable of kicking a whole wave out of the moon.

However, several rockets and ships can land at the moon at the same time. Some soldiers can come from other parts of the moon and all of the sudden come to the area occupied by the Oder gang. Some soldiers are already on the moon while others are on their way. Some of them are still on earth doing other things. The rest are just about to get to the moon.

In the middle of the day everywhere, everyone gets some energy. They drink and eat in order to stay active and working by attempting to rescue Midnightlion53 from prison.

In the afternoon, the troops meet at the borders of the Oder territory at the moon. Once the leading generals arrive at the center of the Oder moon territory, other troops from the borders charge at the enemies and attempt to get them out of the way. epicrsxxx099811 and Bloxman responds with epicrsxxx099811 summoning his copies to confuse the enemies once again. The

national troops charge and manage to kill the weakest Oder gang members at the border. There are a lot of gang members at the center of the territory that includes an old moon shelter, station, and a church as well as the prison Midnightlion53 is in. The goal is to take back the whole area and to also save Midnightlion53. The troops even bring strong supplies for Midnightlion53. The progress is getting done until the troops get too close to the center of the territory.

At the center of the territory, the generals are not aware, and their items for themselves and Midnightlion53 are stolen by the strongest gang members. They use the stolen supplies to quickly upgrade them with phantom gem enchantment and charge at the second wave. The Oder members manage to kill many enemies, take them to prison, and kick them out.

With a failed second wave, the next method is going to be the third and final wave. The troops and soldiers from the country now settle down after a battle and sleeps.

THE THIRD AND FINAL DAY is where the global soldiers across the world help America save Midnightlion53 from prison. The process is expected to take longer and may involve the whole morning to get the whole world to charge at the borders of the moon. Yesterday is too close to saving Midnightlion53. Now the priority is saving Midnightlion53, even if the world fails to take back the Oder territory on the moon. That way Midnightlion53 can come up with better ideas.

The global troops are called off from across the world. Unlike the previous mission to save the wife from Metropolis, the next one is to save Midnightlion53 on the moon. There are lots of space centers across the world, and everyone can gather at the space station.

The US soldiers and officers call other soldiers from across the world to go to the closest space center and launch their rockets either directly to the moon or at the space station in order to

gather more soldiers and crowd the whole place. Now everyone is making their way to the space centers and making their way to the moon. Some rockets can hold more passengers than the ones at Robloxia, allowing more soldiers to gather up at the moon. By the middle of the morning, half of the soldiers are either at the moon or on their way to the moon. The other half is either waiting or not going to the moon at all. Their goal is to watch for anything wrong. Nothing is wrong right now, so there is nothing to worry about. The troops then take their break and plan.

For the afternoon, the troops are already at the moon. Most of them are while a small number of soldiers are still on their way. They wait for the evening to come before charging the Oder members for a short period of time. Meanwhile, the Oder members are well prepared and plan to kick the invaders out of sight. The global troops are now ready to save Midnightlion53. They begin to wait and wait until the leaders call off for the invasion before the evening.

The soldiers all of the sudden charge up with the strongest weapons possible other than the phantom gem enchantment. They make their progress and work together. Many soldiers are distracting the soldiers enough for others to save Midnightlion53. They open the prison door for him and escort them out. They are making good progress at saving Midnightlion53.

That begins to change when the Oder members use their phantom gem to kick enemies out of sight. Nearly all of them are out, and the Oder members take Midnightlion53 back to jail.

**P**lans to take over the world with the Oder Empire is already developing. The top executive officials by Bloxman and epicrsxxx099811 are making plans to take over the nation and make their own. That means they lay out plans for the next few days.

The goal is three days to plan before the first official invasion in the surrounding states and areas.

The three days are going to become divided into topics made and regions by the gang leaders.

After planning, Dr. Bloxman and epicrsxxx099811 go to their computers and begin to make their plans for the next round of invasion. They are going to start a war. They log into their computer first and get to several apps and websites. They open up a drive and make a plan. They actually write a potential story to invade the country. The phantom gem would never be defeated by the enemies as it is capable of taking out a whole wave of enemies in a short time.

The first day of planning involves expanding the territory east. The expansion also goes north and south as well. However, the expansion may or may not become fast. However, there are important places that can be taken over first, which are areas around the Oder territory now. Before any war takes place, Bloxman must ask the states to join first before anything happens.

If the surrounding states manage to agree, the phantom gem process is given to anyone living in that state and is promised to support a potential empire. Bloxman knows that not all of

the residents agree to a dictatorship, so they will either resist or flee. Bloxman believes those who resist the gang territory expansion will most likely flee as those trying to resist and stay in the state will probably get beaten up by anyone with the phantom gem. Bloxman already owns a lot of robots that are very smart, so they will find their way to defeat the enemies. There would also be a lot of soldiers and local officers adapting to a dictatorship that may promise to make the world more stable just by a forced control and a strict set of rules that is believed to be effective.

After spending the whole morning on the computer, Bloxman and epicrsxxx099811 go out to the airport to grab some lunch. They bring them home and eat in the dining room.

After lunch, the real deal is on. The expansion is expected to take place just to the eastern side of the borders. The borders are going to expand further and further. To the north, the Oder territory is expected to expand into Pleasant Valley first before Greenville. These two places are important to Bloxman and epicrsxxx099811. Then, the first few days of the invasion is expected to take place in areas between the Great Lakes and the Gulf of Mexico as the border expands to the east. The next invasion break is expected to stop before the eastern mountains.

During an invasion break, the Oder government will ask the surrounding states to the east to become part of the expanding territory. Bloxman guesses that there may only be a few that agree while others are expected not to agree. Of those expected not to agree, the invasion will take place and will expand from north to center and south to center, in which the center is the main capital of the United States, which has seen the least agreement to annex to Oder. The plan is that the last invasion to the east will involve moving the US capital to the west.

After planning to invade the eastern part of the United States, Bloxman and his friend are done for the day and log off the computer. Last, they go to bed and sleep for the night.

THE NEXT MORNING, Dr. Bloxman leads the plan by planning to lay out the next region that is expected to be invaded. Now that the plans to invade to the east are covered, the new plan is going to cover the invasion to the west. Canada is expected to be the last region to be invaded after the whole continental United States has been invaded. The gang leaders considers a new set of programs to punish enemies through what is called the Holocaust throughout the territory.

Bloxman and epicrsxxx099811 logs into the computer again after getting ready. They generally stay home the whole day as they have enough grocery supplies for today and tomorrow as well. All they do for the rest of the day is just to plan. They work for eight hours. The only time they do other things is during work breaks and after the work hours are done.

The first task to take is invading the big mountains to the west. Just to remember that the majority of the United States is not invaded yet, but plans to cover part of that is done. Now the plan involves invading the mountains next right after the invasion of the east. The mountains are not too far from the Oder border, so the gang will expand its borders into several dry and big plains before invading the mountains. Since mountains serve as a geographic border, there may be a break for the invasion. That means again will the gang ask the Pacific states to annex the Oder territory. There will be no Oder Empire yet at this point of the plan. Either the states will or will not agree. It is likely that some may agree, but San Andreas may not agree.

The gang leaders have the lunch break and grab their lunches from the kitchen downstairs as they sit down for the break in the dining room. They then plan for the afternoon.

After lunch, the gang leaders return to their computers and make a plan to invade the Pacific west which involves three states, one of which is San Andreas. However, San Andreas is expected to become the last state to fall into the Oder territory. The other two states will either

agree to annex or get invaded quickly. Either way, the two states will become the 46th and 47th states to become part of the Oder territory. San Andreas will become the 48th state to become part of the Oder territory as well. Once San Andreas becomes part of the Oder territory, the gang territory becomes the Oder Empire. The empire will then expand even further beyond that.

The next major invasion after expanding the gang territory enough to become an empire is Canada. Canada will be invaded from west to east and south to north. It has a small population compared to the continental United States which will eventually become part of the empire. The most important parts of Canada are all located in Quebec to the gang leaders.

The last two states far from the continental US, planned as the Oder Empire, are going to fall under the Oder Empire just like most of North America. Once the last two states become part of the Oder Empire, the empire will be completed. Last, the leaders log off and sleep.

THE THIRD AND LAST DAY OF PLANNING is going to be about planning to expand the Oder Empire beyond its full and natural borders. In bed but awake, the two plan on spending the morning or parts of it investing and planning to expand the empire territory to the first region as the UK. This will be the first island outside of America to fall under the empire but not as powerful as the states. Eventually, the rest of the plan involves expanding to the whole world.

Bloxman and epicrsxxx099811, the two, log into the computer and plan on expanding to the rest of the world. However, they will talk to the countries to do the same process for a new dictatorship, especially the ones that failed to keep its dictatorship as of now.

The two plan on expanding the territory and considering other empires. The first task is to expand the empire beyond its borders after completing the main empire. What most interests the

two leaders is that in history, the UK has never been taken over by any dictating countries. The plan involves invading overseas. Overseas invasion is the most challenging invasion of all, but the phantom gem is expected to help that kind and make a win out of it. The gang leaders then consider invading outer parts of the new territory before invading the most important parts which covers the main city that includes a set of attractions known as the simulation parks.

After covering one territory outside of the main empire, the gang leaders are expected to ask other gangs in other countries to help take over the developed world. In addition to this, the gang may expand the territories in some parts of the developed world although less important. Either the Oder Empire will cover the developed world or become split into four empires, three of which have existed before but failed. These three failed empires are expected to rise once again and make the developed world made of four empires before the ultimate goal.

The ultimate goal is to take over even the developing world by establishing territories over there. As the phantom gem powers will be given to the other three expanding empires, the total power and industrial level will be way higher than the rest of the world. These empires will be the smartest ones in the world with all controlled people with a few dictators.

By the end of the goal, about 99.99% of the world will be controlled by the empires with all but a few isolated under that. Last, the gang leaders log off, finish the plan, and sleep.

## Epilogue

**I**n the Bloxman capital, epicrsxxx099811 has just finished planning to take over the world. The next thing to do before taking over the world is practice assaulting police officers and some soldiers across the world with the first location being at the Bloxman capital. Once epicrsxxx099811 heads out of his house, he is expecting to see the officers at the border of the Bloxman nation. However, some of the police officers manage to get into the Bloxman capital and attempt to shoot epicrsxxx099811. Once the officers come close enough, they shoot at epicrsxxx099811, but epicrsxxx099811 has armor and mask on.

epicrsxxx099811 then heads to the officers and starts attacking and killing the officers using different weapons. Because the phantom gem is already fully developed with the gauntlet, epicrsxxx099811 is able to wipe out large amounts of waves of officers and soldiers in a short amount of time. Eventually, all of the police officers are either killed or give up.

After wiping out the officers, epicrsxxx099811 goes onto the next step and also attacks several villagers in the village using the same, powerful weapons. During the attack, parts of the village are destroyed by accident while trying to target the villagers.

The last step is testing out and exploring the functions of the army base. The army base is huge and powerful, so the Bloxman army can become strong. In fact, one of the key principles of

the Bloxman group is that the strong can win. They also believe that they can invade surrounding land faster than ever before. They also believe that they can be good at genocide as well. In fact, the Bloxman group hates some of the races and needed for genocide for that race.

In the army base, epicrsxxx099811 and Dr. Bloxman explores the army base and tests out the functions, including all of the offices. In the southwest corner of the base, there is an obstacle course that can also help the Bloxman army become strong as they believe so.

When the Bloxman group is done with the army base, they head back home and enjoy the night. They prepare for the night and plan for tomorrow before going to sleep.

THE BLOXMAN GANG WAKES UP and gets ready for the first round of assaults. The main target is the Robloxia and Robloxity Police Departments. The gang gets ready to fly to Robloxia and assault the officers. They head to their own airport and get their plane ready from the hangar. Dr. Bloxman parks the plane at his gate and invites some of his friends to come to Robloxia to help assault the officers. At least one passenger agrees to come with, who happens to be an illegal gun dealer. In fact, the Bloxman also believes they can reunite all of the illegal gangs under the Bloxman dictatorship before reuniting the rest of the world as well.

Eventually, Bloxman takes off and starts flying to Robloxia. When he arrives, he steals one of the taxis and heads to Robloxia before meeting epicrsxxx099811.

Meanwhile, epicrsxxx099811 can take a quick flight himself to Robloxia directly. He powers up his mask and starts flying directly to Robloxia. The trip takes only less than an hour to complete, but epicrsxxx099811 lands directly to Dr. Bloxman at the western town of Robloxia. Eventually, they start exploring the town and looking for the officers.

After exploring Roboxia, no officers are nowhere to be seen, so the group leaves some messages that the Bloxman group owns the Roboxia town station. Next, the group heads off to Roboxity where they look for an officer, but no officers are located at the police station. Just like the town of Roboxia, Roboxity shares the same fate with a Bloxman message.

After assaulting the police stations and some places within the town of Roboxia and Roboxity, the group then get in the van and head to the eastern neighborhood of Roboxia. The first destination is the gas station where the group eats their lunch and grabs a better pistol. Eventually, they head out of the gas station and encounter an officer. The group attempts to arrest a police officer, who disagrees at first. The officer seems to be inexperienced, so he agrees to get arrested and head into the police station. Eventually, the inexperienced officer bails out and tries to chase down the illegal gun dealer, who is part of the Bloxman gang.

The Bloxman group explores the neighborhood to look for more officers to assault. However, there are no officers to assault yet, so the group heads back to the police station and encounters lots of police officers. At first, they try arresting the officers and sending them to jail. Because the jail is locked, the group threatens the SWAT officers to help Bloxman take over and grow into an empire. The officers disagree and send the group to jail.

THE GROUP THEN GETS MOVED TO THE STATE PRISON where they get ready and escape. In the morning, they spend time in prison and explore the facility once again. They also look for police officers, but only a few show up in the prison.

After 11:00 AM, the group escapes and attempts to assault the officers. The illegal gun dealer shoots at the police officers before escaping to the next target. After escaping, the group

goes to the criminal base where they change clothes to the Bloxman outfit and grab weapons. They then spend the entire day traveling to Westover Islands. Eventually, the group steals an RV at the nearby RV camp south of Robloxia and spends the sunset time traveling to Westover Islands. Eventually, the group goes to sleep while the RV travels through Liberty City with a night driver getting through the streets before the next day begins.

THE BLOXMAN GROUP WAKES UP and gets ready to assault several officers. They arrive at Westover Islands where they see an officer before hiding, so the group does not assault. They spend half of the day trying to look for officers around the region. They explore Westover, Kensington, South Beach, etc. They drive around for hours before time is up. Then, the group heads off to Odessa to look for more police officers to assault.

In Odessa, the group explores the region and looks for more officers. They first go directly to Odessa to look for police officers. However, there are no police officers working, but the group sends a message to the station anyways, claiming that the entire police department should help the Bloxman take over and become the Bloxman Empire.

Later in Newark, the Bloxman group goes to the police station and sends messages across the small city to convince the police department to side with Bloxman and help expand, so that the Bloxman gang eventually becomes big enough for the empire.

Finally, the group arrives in Delancy Gorge where they send the last message to the police station over there. They convince the police to side with them before sunset. During sunset, they hire a night driver again and get ready to sleep. The driver gets in the RV and starts driving to the next two targets, located very far away in North Carolina.

WHEN THE RV ARRIVES, the Bloxman group wakes up, and the driver arrives at the Currituck car dealership. The Bloxman group grabs their rental van and starts driving to the police station located between Currituck and Swanquarter. From there, they send a message to the police department, begging that the department has to side with Bloxman.

After sending a message to the police department, the group finds that they have enough time to convince other citizens and businesses to side with the Bloxman dictatorship. The Bloxman group eventually goes to every single town in the Currituck region and starts sending messages about preparing for the new government and the Bloxman Empire.

Then, the Bloxman group takes a lunch break and drives to Monroe, a big town, to get the residents to side with the Bloxman group. The Bloxman group then goes to the police station and sends a message to get the police officers to join the Bloxman army to help expand into a Bloxman Empire. The message is followed by a march through Monroe streets by the Bloxman group with the leaders leading the way of the parade. Almost everyone reacts to the parade in some way by either going outside or watching from home. Anyways, the Bloxman group finds a hotel to settle with during sunset and starts getting in before sleeping in bed.

ON FRIDAY, the Bloxman group wakes up again and packs up to go to Pacifico. They start packing their gear up and check out of the hotel. From there, they go to the van and take a long drive to the airport which is north of Currituck. At the airport, they check in for a flight and go through security before waiting for a plane to arrive. This is because no planes can be seen yet. While waiting, the group then finds a way to assault a police officer. They also plan on and research ways to also assault the US army and take over the base.

Eventually, the plane arrives at the gate and stops. Everyone in the plane gets off, and the Bloxman gang gets on the plane. Once they get on the plane, nobody can be seen in the plane, but they see the crew and some passengers just getting off the plane. This allows the two leaders of the Bloxman gang to take control of the cockpit as well as the gate controls. The plane is ready to go to Pacifico, which is the first target of the Bloxman group.

After waiting, the gang leaves the gate and takes off. They spend an hour on the plane until they arrive at the Pacifico Airport, located south of Pacifico itself. When they arrive, they get through the airport and go to the car rental building across the street. They spawn a transit van in order to carry the entire Bloxman crew into the van to Pacifico.

The Bloxman gang heads to Pacifico with the first destination being the police station. From there, they send a message and explore the police station to send messages everywhere. Just like previous messages, this message tells the police department to ditch their goals and change goals to help Bloxman take over parts of the world and expand its land big enough to consider Bloxman an empire. Then the group heads off to other important places of Pacifico such as the boardwalk theme park and the stunt track before leaving.

Eventually, the next target for the afternoon is Bloxywood. The Bloxman gang returns to Pacifico airport and takes a short flight to Bloxywood airport. From there, they head to the police station and send a message to help make the Bloxman Empire possible. Then the Bloxman gang explores the city and settles down in an apartment for the night.

THE NEXT DAY, the Bloxman group wakes up and gets ready to assault more of the police departments across the continent. The group orders that one of the Bloxman members explore

the world and convince other people there to take over parts of the world, so the world can be made up with a few empires instead of hundreds of countries. All of the empires should lack democracy and have even more powerful dictatorships, socialism, and nationalism.

After getting ready and calling other Bloxman members, the group leaves Bloxywood and explores major cities across the region first. They convince major police departments to join the Bloxman gang and help shape the Bloxman Empire. They also convince the police to help Dr. Bloxman become the emperor as well. First, they assault police departments and army locations in the Pacific west. Then they head east gradually through the mountains before traveling through the south. Then they go north along the Atlantic before reaching places north of Robloxia. Finally, the group assaults and tells security in the Great Lakes and the midwest. After all of that, they head to Greenville to start the first invasion. Greenville is located close to the boundaries of the current Bloxman-US border, so it is easy to expand and invade.

*Afterword to the  
final version*

AFTER READING THIS BETA VERSION, how many corrections and recommended edits do you think I should make? If there are corrections, do not worry as the final version of this story is going to come somewhere around 2024. Also, this is a story part of the series. There are many more stories that would be made in the series than this one. This means that another story as well as the following stories will continue and contain and end after this story.

Between the middle of 2021 and 2022, expect that more Roblox and other stories are to be published and released as their first versions. These stories have an attempt to take place in the same universe as the other three series to be covered. Due to the stories taking place in the present day, all three other series are considered prequels to the Roblox Series.

*Thanks and  
Acknowledgements*

Thank you to everyone that I know to come up with Roblox. I discovered Roblox thanks to the family I am in. I found Roblox interesting for me to play and wanted to make some stories or shows about it. With me knowing Roblox, I can have different experiences and have fun. I even take inspiration from the games that used to help me attempt to recover from a mental illness that caused me to struggle in certain areas of life, making life challenging and stressful in some parts of it. I even had fun playing Roblox and searching up in order to come up with the “dots” that can help connect the story I am about to make. In addition to the already existing Roblox games, I have already created many Roblox games through the Studio and come up with models that would help them become the source of one of my stories. This is very important because I am exploring ways for me to become good at things using my strengths. Thanks for all of the content that you have made as well as some support that makes this first story possible.

*Gener  
Guzman*

I was first raised in a family where I would do a lot of crazy actions being a kid. I then felt like I kept on being a small kid during the early years, thinking I will be that small forever. This is not true as I gain a lot of skills that adults would do such as writing and producing videos that gain popular views. I have a YouTube Channel called GeneralEpicStudios in which is the central site for me if you want to go to my other profiles linked everywhere to connect with me. I made one or two series of shows about grounded that grew my channel even bigger, with two or three seasons of grounded videos produced in 2015. After that, I began to teach lessons at the school experiences at Roblox between 2016-2019. I bet this story and all the other stories from the four series can grow this channel even more. In the 2020s, I am looking forward to producing three more series of grounded videos and four series of books with visual adaptations. These are all of the works that I am looking forward to producing, which I feel is basically the future.

*Readers Guide For  
Roblox 2*

Coming Soon.

Dr. Bloxman and epicrsxxx099811 are trying to rise their gang and take over the nation to turn it into an Oder Empire, an empire full of important online daters and other dictating features. Meanwhile, Midnightlion53's wife has been kidnapped, and Midnightlion53 and the rest of the world is trying to take back from Bloxman. Will the world be saved?

**About Me:** I already made a popular series in my channel, teach several lessons in Roblox, and develops four series of stories.

**ROBLOX 2**
